VOL. XIX.....NO. 5618. NEW-YORK, FRIDAY, SEPTEMBER 24, 1869. PRICE FOUR CENTS.

THE CUBAN DIFFICULTY.

The Fleet of Spanish Gunboats Now in the Harbor.

Description of the Vessels and their Probable Destination.

Important Orders Relating to Them in the Hands of Naval Officers.

Atrocious Treatment of Prisoners in Cuba by the Spaniards.

An Ex-Cuban Officer's Account of the Battles at Las Tunas.

Views in Washington on the Question at Issue.

THE SPANISH GUNBOAT FLEET.

One Now Ready for Sea—Probability of their Use Against Cuba—A Description of the Vessels—Important Action of the United States Authorities.

Our readers are probably not aware that the harbor of New-York is at the present moment being made a naval depot by the Spanish Government, and that in this port a fleet of gunboats is now being completed for service in behalf of that nation. That such is the fact, however, is beyond denial, as any one may ascertain for himself by personal investigation, so openly are the necessary operations carried on by those engaged in constructing the vessels. It is in consequence of this ignorance or indifference on the part of the public that we propose to give such details of these Spanish war vessels as have been procured, in order that a correct idea of their character and importance may be afforded to those interested in the present status of the Cuban question.

COMMENCEMENT OF OPERATIONS.

Early last Spring one Captain ARRAGON, an officer of the Royal Navy of Spain, came to this country in company with two other officers of infenor rank. The visit was not deemed of much importance by those few cognizant of the fact, but the sequel shows that it may lead to considerable difficulty between the Administration and the Government of Spain. Some three months ago rumors began to circulate that the shipbuilders at Mystic, Conn., and neighboring ports on the New-England coast, as well as at POSLIKEN'S ship-yard, Brooklyn, and at STACK'S ship-yard, Greenpoint, were all busily engaged in building a series of small vessels, which were intended to be used as gunboats by the Spanish Government. Another story was that the Cuban Junta were the projectors of the fleet, though that phase of the matter has long ago been found incorrect.

It now appears that these Spanish officers came armed with authority to contract, in concert with the Spanish Resident Minister at Washington, for the construction and equipment of a fleet of thirty small gunboats, and the necessary preliminaries having been perfected, the work upon the vessels has been actively prosecuted all Summer. Now that the Fall months are rapidly carrying us into Winter, the progress made upon these vessels has been so persistently carried on, that the fleet is rapidly approaching completion, and in a few weeks will be ready for sea.

ACTION OF THE GOVERNMENT.

About two months ago the attention of the United States Government was directed to the fleet by the arrival of a portion at this City, when Marshal BARLOW was instructed to make an investigation in relation to the matter. The Marshal then ascertained that the thirty vessels had been contracted for by CORNELIUS H. DELAMATER, a partner in the firm owning the extensive iron works in this City; that the gunboats were to be delivered in a complete condition, fully armed and equipped for service, and that the Spanish Government had agreed to pay her sum of $50,000 in gold for each vessel without the armament. The latter was to consist of a heavy pivot gun in the bow of each boat, and to be supplied at KIMBALL'S foundry at Cold Spring.

As the United States Marshal reported that he had very good reason to believe that the entire fleet of thirty vessels were intended for service against the patriot forces in Cuba, and guard the entire coast of that island, the authorities of Washington gave orders for the seizure of the vessels. The seizure was effected on the 26 and 30 of August last, although the work on them was not checked or impeded in any way, the evident intention of the Government being not to act in a decided manner until further developments had been made.

WHAT THE GUNBOATS ARE LIKE.

In order that our readers may have a clear and comprehensive idea of the capabilities of these Spanish gunboats, it will be necessary to give a minute description of the vessels, their number, present whereabouts and actual condition as to progress, as well as the probable date of their completion. These facts have been obtained with considerable difficulty. Each vessel is of the same size and style, 105 feet long between perpendiculars, 22 feet beam, 8 feet deep, 170 tons register, and five feet eight inches draft of water. They are constructed of the best material, on handsome models, and are perfectly clear above decks in order to give the guns full play. The boats are of 175 tons burden on the average, schooner-rigged and screw propeller, the latter to be served by compact and forcible engines of the best build. Average speed, ten knots per hour, and with a draught of nearly five feet when fully equipped for service. Crew, about thirty-five officers and men, all told. The boats are to have a carrying capacity for thirty-two tons of coal, or sufficient for ten days' service. It is anticipated that the vessels can also be moved at good speed under canvass, and the armament is to consist of one pivot 100-pounder only.

WHAT THEY CAN ACCOMPLISH IN CUBA.

It will thus be seen that the vessels are intended for coast or inside service, and are to be made available for attacking and demolishing river, fortifications, as well as harassing a hostile land force which may be already engaged with an enemy on shore. As such they will be quite formidable as war vessels, considering the scope of operations in which it is no doubt intended to employ them, being strongly built and capable of carrying a heavy armament. In fact, these Spanish gunboats are very much like that useful class of war vessels so much in requisition by our Government during the late war, for the blockade of rivers and minor ports on the Southern coast, as well as for important service on inland waters. They in great part resemble the gunboats which took so active a part in the operations on the York and James Rivers during the Peninsular and overland campaign of McCLELLAN and GRANT, and it is easy to see that the Spanish Government intend them for just such subsequent service with land forces. Of light draft, clean build and propeller model, these vessels promise to be a decided acquisition to the coasting navy of Spain, and are probably of such a class as it would be almost impossible to safely bring across the ocean when fully armed and equipped. It is a knowledge of these facts that renders it almost certain that these gunboats are intended for active and decisive operations on the Cuban coast, where they will guard the innumerable estuaries and arms of the sea, together with effecting a blockade of the river mouths. On this duty these vessels—armed as they will be, if allowed to go under the control of Spain—will be quite able to stop such reinforcements or munitions of war as may be dispatched to the Cuban forces by their agents abroad, and the result can be easily foreseen. In fact, these gunboats will effectually quell the revolution now progressing on the island.

HOW THE WORK PROGRESSES.

The fifteen vessels already in port are so far advanced toward completion that they are now all lying at the extensive docks of the Delamater Iron Works, at the foot of Thirteenth-street, North River, for the purpose of receiving their machinery and rigging. This work is now being rapidly pushed by the contractors, and the result is noticeable each succeeding day, so fast does the entire work proceed.

The remaining fifteen vessels still remain at Mystic, Conn., in the hands of the shipbuilders. Their hulls are finished and in the water, but the joiner work upon them has been only recently commenced, consequently they do not present a very forward appearance. They have as yet no masts, spars, rigging, machinery, or gun-carriage fittings, and it is believed by those who have a practical knowledge of naval construction, that it will take at least six weeks before the joiner work alone can be completed, and the time necessary for their final completion for sea service is fixed at over three months. Work is, however, being pushed rapidly upon all the vessels, by order of the Spanish officer there stationed, and every man that can be advantageously employed has recently been put to work, the scene of operation at the yards being an interesting and bustling one. The other half of the fleet, as has already been stated, is now at the Delamater works, in this City, receiving the finishing touches preparatory to their departure for their proposed scene of action. Beside the one already making trial trips, fourteen are now having their machinery and boilers put in, though the joiner work is still in an unfinished state. They are, however, in so forward a condition, speaking in a general sense, that it will only require from twenty to twenty-five days to place the entire batch in instant readiness for sea. These final preparations are being executed under the immediate eye of Captain ARRAGON and his Lieutenant, who narrowly scan each and every detail, and are evidently men who have a thorough knowledge of naval architecture and equipment.

GUNBOAT ALREADY IN USE.

One of the fifteen vessels already in the harbor has been made a model or specimen vessel of the whole class, and it is to that end that work has been exclusively pushed upon her during the past six weeks, in order that the necessary experiments might be made for the satisfaction of the Spanish naval officers having superintendence of the construction of the entire fleet. This latter gunboat has been placed in such a state of forwardness as to have already made two trial trips up the Hudson as far as West Point, once under tow and the second time by her own steam. These initial trips were made mainly for the purpose of receiving her armament and testing the working of a new description of gun-carriage invented by Captain ERICSSON, and it is understood that this gun-carriage performed so well in throwing both shot and shell, while practicing in the river off Cold Spring, that it has been decided that the entire fleet shall be provided with these new carriages, which are so admirably arranged as to permit a small force of men to easily manoeuvre the immense mass of metal contained in the 100-pounder. Since this initial gunboat has made these trial trips with such success, the work upon her has been hurried to such an extent as to place the vessel in so complete a state as to render her ready for sea at any time in less than thirty-six hours' notice. This vessel now only carries a single 100-pound rifle pivot gun of the best make, which formidable arm is mounted at her bow upon a low and apparently simple carriage. This gun seems to be intended as her only armament, though carronades may, no doubt, be placed amidships at any time, if necessary or so desired.

ACTION OF THE NAVAL AUTHORITIES.

As may be readily supposed, these fifteen vessels now lying in dock in this city, although four-teen have no propellers in yet, and only one of the entire lot in actual working condition, are now under the constant surveillance of the naval authorities of this port, and their daily progress is made the subject of special report by those officers of the United States Navy who have been detailed for that duty. The single specimen so nearly ready for departure is an especial object of attention, and Admiral GODON, the commanding officer at the Brooklyn Navy-yard, has, it is understood, important and grave orders regarding her should it be attempted to take the vessel from the harbor. Precisely what are his instructions cannot of course be known, but it seems quite certain that he is armed with authority to act in a decisive manner. A revenue cutter has been for several weeks stationed in the North River, off Hoboken, for the purpose of keeping a strict watch upon these gunboats, and especially upon the movements of the one now on trial service. Her movements are not interfered with so long as she confines herself to the river, and advantage of this privilege is almost daily taken by those having her in charge. No doubt the naval authorities of this port are in possession of such explicit orders as will enable them to take immediate and decisive action in the event of a supposition being manifested, by those having the gunboats in charge, to carry the vessels from the harbor. Whether any trouble is apprehended by the authorities is not known as yet, though the present state of affairs is essentially a critical one.

SCENES AT THE IRON WORKS.

The visitor to the extensive establishment and docks known as the Delamater Iron Works, situate on the North River front, between Thirteenth and Fourteenth streets, cannot but be deeply impressed by the busy scene, in the midst of which he suddenly finds himself. A peep into the foundry reveals the fact that the force of moulders has been augmented to the full capacity of the building, and the eye is attracted by the large number of men engaged in preparing moulds for propeller screws, one end of the shop being almost exclusively taken up by the huge structures of iron and brick necessary for the proper shaping of the fan moulds. In other parts of the moulding room men are at work upon the heavier castings for marine engines, and the greatest activity apparently prevails throughout. Men are busy removing moulds and removing the still smoking castings, while another gang is employed in bringing fresh materials for a renewal of the work. In the machine room, every one of the innumerable lathes and machines are filled with castings and wrought pieces of iron, which are being rapidly wrought and planed into the required shape and exact size as necessary in the construction of steam engines. As he walks through the shop the visitor cannot help noticing that the workmen are engaged on duplicate sets of machinery, narrowly any working model in the entire establishment, every eight pieces of metal, each identical in shape with the other. The room hums with an air of busy life, and the workmen are kept so actively engaged that the intruder escapes all notice but a passing glance as he passes. In the finishing room, on the second floor, the various component parts of the thirty engines intended for the gunboats lying around are being rapidly assembled, and it is readily observed that they are of one build and style, thereby explaining the presence of such a large number of duplicate machines in the various manufacturing shops. In the boiler rooms and yards the same uniformity of work is also noticeable, nearly the entire force of workmen being employed upon a series of ship boilers of marked workmanship and compact arrangement, and a dozen of these boilers are already finished, having the finishing touches on the bulkheads preparatory to their being hoisted into place and lowered into the gunboats by the gigantic cranes standing near by. A cursory examination of these boilers will satisfy even those unfamiliar with the necessary requirements of such structures that they are being built in a thorough and substantial manner. In shape they are flat and broad, as the distance between decks of the gunboats is necessarily restricted, but they are so constructed as to produce steam at their rated capacity with an economical use of coal. Each one has many hundred tubes, and the furnaces are so constructed as to allow of the ready use of any description of fuel. The boilers are marked with the figures corresponding with those appearing on the bows of the vessels for which they are intended.

In the street outside of the works and on the wharves, other gangs of workmen are employed in making the iron cylinders to be used as smoke-stacks on the gunboats, and as that portion of the fleet in the docks have already received their stacks, it is apparent that those now in progress of manufacture are intended for the vessels at Mystic, and expected to arrive in the stream at an early day. The masts for the boats are being stepped and braced, four of the vessels having been thus furnished, and the remainder will be fitted before many days. The boats are all full of workmen, who are pushing matters to the utmost, all the several operations being under an evident pressure from some authoritative quarter.

The appearance of these gunboats that have been furnished with masts is a very rakish one, as the smoke-stack and masts lean toward the stern in rather piratical shape, giving the boats an air of mischief not incompatible with their real character. In speaking to the workmen engaged on the vessels, the visitor soon learns that the craft are intended for Spanish gunboats, and the men seemingly take considerable pleasure in announcing the fact, as though it is a novel and interesting fact, as no doubt it is to any one not thoroughly posted in the matter. A visit to the Delamater Iron Works will just now amply repay those curious about these gunboats, now becoming so important in an international point of view.

MOVEMENTS OF CUBAN OFFICERS.

In connection with this fleet of war vessels intended for the use of the Spanish Government, it may be well to state that it is shrewdly suspected by those who have given the matter any special attention, that there are now in this City a large number of Spanish naval officers of ordinary rank, as well as a select class of naval engineers. These officers, it is believed, are using the specimen gunboat for the purpose of studying the qualities of the fleet, and gaining a practical knowledge of their powers and mode of action, in order that active commands may be immediately assigned them on any emergency at any time. If this is really the case, not only is the harbor made a naval depot for the use of Spain, but our waters are actually being used for the movements of a practice ship for the acquirement of knowledge that is to be used in killing our brothers and sons, the patriot forces of Cuba. It would seem, however, that such a reckless procedure on the part of these Spanish officers who may be in the City, and it is to be hoped that the suspicion entertained will prove exaggerated.

Precisely what will be the result of the matter is now a subject of speculation, the solution of which can only be determined by time and events now so rapidly crystallizing in the Cuban question. These thirty gunboats may be the means of cutting through the present perplexing state of affairs, or they may prove a source of extreme danger and annoyance to our Government. That perfect faith will be maintained by the Administration there can be no reasonable doubt.

SPANISH ATROCITIES IN CUBA.

Seven Months' Imprisonment of an American—He is Robbed and Maltreated by the Volunteers—His Wheel Released—A Suit for Heavy Damages Against the Spanish Government.

Dr. ALFRED T. SIMMONS, an American physician, who for the past thirteen years has been a resident of Cuba, and who was confined for seven months in a Spanish jail at Puerto Principe, on the charge of *infidencia*, (disloyalty,) recently arrived in this City, having been finally released by order of Captain-General DE ROSAS, and transported to the United States.

Dr. SIMMONS declares that he was treated with great atrocity by the agents of the Spanish authorities. In a letter written from his place of confinement to the Captain-General, demanding his release, after denying that he had taken any part in the politics of the country, he details the circumstances of his arrest and imprisonment. "The policeman," he says, "who arrested me searched my house, and took therefrom all my valuable papers, a case of surgical instruments, $1,800 in gold and a draft for $6,000 more. I was kept ten days '*in communicado*,' and at the expiration of this time I was brought before Don ANTONIO LAGARCA, the 'Fiscal' appointed to investigate my case and take my declaration. The charge against me was '*infidencia*,' bringing the written testimony of several Catalans, declaring that I had on various occasions expressed myself very strongly against the Spaniards and the Spanish Government. This I denied, and cited several witnesses to prove that it was only against the old Government that I had thus expressed my disapprobation, and that on numerous occasions I had publicly advocated the acceptance of the programme of General DULCE, and the reforms proposed by the Provisional Government at Madrid. These explanations, I made to the 'Fiscal,' and had them corroborated by the testimony of many of the most respectable persons in Puerto Principe. Nevertheless, in view of all these facts, my defence was not considered strong enough to justify my judges in setting me at liberty. At the end of two months from the time of my arrest, I was informed that although no evidence had been produced to implicate me as being in sympathy with the rebellion, yet sufficient had been discovered to render me suspicious, and that it had been deemed prudent by the Governor to keep me confined in prison until I could be sent to the United States. The object of this order I have been entirely unable to comprehend, and it is rendered still more mysterious when I reflect that in one week after my arrest the amnesty proclamation of General DULCE was made, and all the other political prisoners, over seventy in number, were liberated, with the exception of myself. On making inquiry for the reason of this, I was told that being an American I was not included in the amnesty.* I then immediately wrote a letter to my counsel at Havana, giving him a full history of my case and a detailed statement of all the circumstances connected with it. At the end of fifteen days I received an answer stating that he 'had represented the circumstance to General DULCE, and that in a few days he had no doubt that everything would be made right.' In one month after I received another letter from him imparting the important information that he was doing everything in his power, that I must have patience, and that in a few days I should be released. It is now over two months since I received this gratifying intelligence, and over six since I have been in prison. I must confess that my patience is becoming exhausted. All other means having failed I have now determined to appeal directly to your Excellency, under the full conviction that whatever delinquency or delay there may be in the administration of justice it is not to be traced to any lack of moral honesty or want of energy on the part of the Superior Government. There are many acts of violence and injustice committed in the interior, which if known to your Excellency I am sure would meet with your most unreserved condemnation. I am certain, so far as my own case is concerned, the volunteers procured my arrest for the sole purpose of robbing me of my money and property, and had they found the least proof of *infidencia* I would have been shot. My suspicions, that such was their object are still more strengthened by the fact that after my trial was concluded, in requesting Mr. LAGARCA, prosecuting attorney, to return me my money and property, he replied by advising me to keep very quiet and to say nothing about it. He said the volunteers were very brave, (very mad;) that if I should irritate them by making any such request it might cost me my life. It is needless to say that from what I have seen in similar cases I have considered it very prudent to take his advice. This I have been better able to do on account of having many friends in town, who have assisted me with money to keep me from starving; otherwise I should have been obliged to have eaten cats and other repugnant articles, as many of the other prisoners were on several occasions compelled to do. I hope your Excellency will pardon me if I venture to give it as my opinion that the policy of the Government in the mode of carrying on this war is very distinct from that of the volunteers. The programme of the latter, as they have on many occasions confessed to me, is the utter extermination of the whole white creole population. They say they intend to place the island in such a situation that another revolution will be impossible. The only way to accomplish this is to annihilate, on whatever pretext, all Cubans, whether found with arms in their hands or not.

At first I supposed this was only said to frighten people from taking part in the insurrection; but subsequent events have clearly proved that such is the real policy, not only of the volunteers of this place, but the volunteers generally all over the island. This, it seems, is what has produced so much misunderstanding between them and the regular troops, the latter being generally in favor of carrying on the contest according to the rules of civilized warfare, the former, of the indiscriminate massacre of all natives, whether taken prisoners of war or found quietly attending to business on their estates. Horrible as this programme may appear to your Excellency, the history of the last six months too clearly proves the truth of what I have stated. Were I not certain that the cruelties and outrages on humanity are kept a close secret, and that if known meet with the most unequivocal disapproval from your Excellency, I should not have the temerity to thus expose them, being, as I am, a prisoner, and liable every moment to feel the consequences of their savage vengeance. I feel that it is more pleasure to speak the truth, if by that means I can stay their bloody hands, than to keep quiet merely for the object of securing my own safety. As this is my desire, I hope your Excellency will profit by the information I am now imparting, and endeavor, if possible, to apply the proper remedy. Whatever may be the opinion of the Supreme Government in regard to this rebellion, I cannot believe that it will in any way sanction the cruel means by the local authorities of this place to put it down. Six months ago the rebels established a camp within one league of this town. I can see its flag even now floating triumphantly in the breeze on the *Loma de la Mula*. Within this period there have arrived at Puerto Principe more than ten thousand regular soldiers, yet the flag is still there. Instead of attacking the rebels and destroying their camps and those who were in arms against the Government, they have been occupying themselves during this time in the destruction of private property, sugar and cattle estates, violating women, and assassinating old men and boys who have taken no part in the revolution. Following the example given by VALMASEDA, nearly every estate in this jurisdiction has been laid in ashes and their occupants compelled to flee to the woods for shelter. Even during the forty days' amnesty granted by General DULCE a raid was made by the regular troops into the country, headed by Colonel GOUMENIS and AQUILAR, assaulting the estate of MIGUEL SALDIVAR, and not content with the destruction of the machinery and burning the cane-fields and driving off all the cattle and horses, they forcibly robbed the women who had taken refuge at the house of all their clothing, jewelry and $1,000 in money. But long ere they made another raid, and visited the country seat of Mr. RODRIGUEZ. He was an old man, and had always remained very quiet, and had taken no part whatever in the revolution or politics, but unfortunately he was reported to have money. After the soldiers had taken possession of all his silver ware they then demanded his money. Refusing to tell where it was they commenced pricking him with their bayonets, and threatening him with instant death unless he gave up his treasure. At last, in order to save his life, he was induced to do so. Tearing up the bricks of the floor under his bed they came to a box containing $20,000 in cash, besides watches, diamond rings and other valuables. The Captain of the party then accused the old man of being a rebel, and a soldier, who undoubtedly understood the plan, ran him through with a bayonet. To crown this bloody tragedy and keep it a secret from the world, all the house servants were collected together and shot; but it seems that this grand feat of arms was too good to be kept secret, the soldiers in a few days discovering the whole transaction. These are only two out of the many examples I could cite of this character. It is calculated that over 200 peaceable citizens within this jurisdiction have been assassinated in this way since the commencement of the war. The regular soldiers are not so much to blame in these outrages as the volunteers, the latter expressly trying in this way to exterminate all creoles, confiscate their property, prevent those who are absent from the island from returning, place soldiers on all the estates to compel the negroes to work, and by that means render not only another revolution impossible, but reimburse the Spanish Government at the same time for the expenses of the war."

Dr. SIMMONS says that in June last, becoming impressed with the cruelties all over the island, he wrote a long account of them to President GRANT, giving the true state of affairs at that time, hoping it would have the effect of causing the United States to interfere. While in prison he again wrote to President GRANT, asking him to demand his release, the Consul at Havana, Mr. PLUMB, having stated that he was unable to assist the prisoner. He received no reply, however, and subsequently to the addressing of the letter of June last with the same result. His first communication to the President was sent to Washington by a special messenger paid by Dr. SIMMONS. During his confinement in prison he was obliged to support himself, as the prison diet was next to starvation. Hardly suffering in prison for five months without any hope of being liberated, he became desperate, and resolved to secure his liberty or die. As there were seventy prisoners besides himself, they planned a formidable conspiracy to break through and escape. As a last resort, however, Dr. SIMMONS addressed the letter to the Captain-General himself, demanding his immediate release. Shortly after dispatching this letter, and before the plot for the escape was matured, the release of the prisoner was ordered.

About ten days after the date of Dr. SIMMONS' letter to the Captain-General, he was liberated from prison and sent to the City of Havana under guard, and from thence by the American steamship Missouri to the United States, arriving in this City about the middle of last month.

For the damages he has sustained, he has retained the services of Mr. JOHN W. GRATTAN, counselor-at-law of this City, to institute a suit against the Spanish Government for the recovery of $100,000; and in a few days the Spanish gunboat now building in our waters, will be attached to await the issue of the trial of this important case.

NEWS FROM THE WAR.

An Ex-Cuban Officer's Account of the Las Tunas Affair—Other Operations—Officers of General Jordan's Command Killed.

NEW-ORLEANS, Sept. 23.—An ex-officer of Jordan's Cuban army, who was disabled in service and resigned, and who left that General's headquarters in the South Bayamo District on the 18th of August, and the Cuban lines on the 20th, has arrived here, and makes the following statement in regard to affairs since the 1st of July: Early in July about 300 Spanish troops left Las Tunas for Marianon, a seaport, for supplies for the garrison. General GARCIA, who was operating in that district with 800 men, learned this fact and made preparations to intercept them on their return. At Marianon the Spanish troops were attacked with cholera, and it was not until fifteen days afterward that they started with their convoy for Las Tunas. On their second day out skirmishing began and continued until within fifteen miles of Las Tunas, where they were attacked by GARCIA in force and badly defeated, with the loss of their entire convoy, 80 killed and wounded and 119 prisoners. The convoy consisted of ten wagons and 300 stands of arms. The Cubans lost 30 killed and wounded. Two days after this GARCIA attacked Las Tunas, whither the defeated Spaniards had retreated, and succeeded in getting into the city, but was finally, after fighting four hours, driven out with heavy loss.

On the 8th of August General M. CASTILLO, by order of QUESADA, attacked Puerto Principe with 3,000 men, and after gaining the interior of the town was repulsed with the loss of 300 men killed and wounded. A few days after this (about the 16th) the Dominican General PUELLO, commanding the Spanish troops, attacked the Cubans under F. CASTILLO, between Baga and Nuevitas, but was defeated with the loss of 32 men. In the afternoon of the same day, being reinforced, he again attacked CASTILLO's force, and this time succeeded in dispersing them. No further fighting of note (though there is daily skirmishing) had taken place, or at least none had been reported up to the time of this informant's departure, at which time the principal Cuban Generals were commanding as follows:

General QUESADA, District Puerto Principe.
General FIGUEREDA, District North Bayamo.
General JORDAN, District South Bayamo.
General GARCIA, District Las Tunas.
General F. CASTILLO, District Nuevitas.

CARPENDES' Government was located at the village of Decoada, in the centre of the Puerto Principe District.

As the person from whom this information is obtained left General JORDAN's headquarters in South Bayamo on the 18th of August, where the forces of that General were operating against VALMASEDA, he could not have been in the reported fight at Las Tunas, which is said to have taken place on or about that date. There is some cholera among the Cuban troops, but their general condition is good, and provisions were plentiful. General QUESADA holds about 1,200 Spanish prisoners and General JORDAN about 800.

The blockade of the island is not at all rigid. The expedition of ANTONIO JIMENES, with sixty men and 1,200 Remington rifles and a large quantity of ammunition and supplies, were safely landed some time ago.

Of the officers General JORDAN took out with him he lost five, as follows: Dr. AMARILLE, of New-York, killed at Bay of Nipe, in the first fight; Captain DUPONT, formerly of the United States Army and signal officer at the Brooklyn Navy-yard; he was wounded at Canalito in the second fight, and died a few days afterward at Bijara, to which place JORDAN had moved; Captain M. LEMENDUE, wounded in the same fight, and died of his wounds at Bijara; Captain DE GIACOURIA, wounded and left on the field of Canyas, and PONCE DE LEON, second in command of engineers, who surrendered at Cuayas, where both he and DE GIACOURIA were put to death on the spot by the lancers after they had surrendered.

THE NEW-YORK JUNTA.

A Manifesto Complaining Against the Members—A New Organization Proposed.

An anonymous "manifesto" comes to us, charging that certain members of the present Junta have been and are still busily appropriating to their own use the moneys raised for the purpose of carrying on the war; that they make all of their transactions too public, and instead of having any system to govern them in the purchase of supplies, arms, &c., the matter is unwisely intrusted to many hands, thus rendering exposure almost unavoidable; that the cause of the failure of certain expeditions is attributed in part to the fact that the Junta solicited for a period of six weeks some 1,200 volunteers, who were carelessly distributed throughout this City; that on the night of the 26th of June last, the time appointed for the sailing of the steamer *Catherine Whiting*, (Colonel RYAN's expedition,) so loosely were the details carried out by the Junta, (RYAN being then in prison,) it is notorious that squads of Cuban soldiers were seen parading the streets leading to Jones' Woods, the place of embarkation, with carpet bags and arms in their hands. In this way was the eye of the law drawn upon them, and the whole party eventually captured. After the three small vessels—the *Cool*, *Mobile* and *Chase*—had reached Gardiner's Island loaded with troops and implements of war, the *Catherine Whiting* laid under the guns of a revenue cutter more than eight hours, every facility being offered for their escape.

It is further claimed in this anonymous production, that the Junta neglected the welfare of the men composing RYAN's expedition, while the latter were at Gardiner's Island; and that some of the officers connected with the filibusters will withdraw in disgust. Charges are made against one or two members of the Junta; but, of course, we do not give currency to accusations to which no responsible name is signed. In fine, the whole secret seems to be contained in a proposition to form a new Junta on this programme:

First, to form a new Junta, composed of men of unimpeachable integrity. Second, to "push things," and close the present do-nothing style of management. Third, to raise an ample war fund at once, by throwing the Cuban bonds upon the market and appointing responsible banking houses in the United States as agents for the sale of the same.

THE CABINET ON THE "QUESTION."

No War with Spain—The Attacks on General Sickles.

Special Dispatch to the New-York Times.

WASHINGTON, Sept. 23.—There are no later advices in regard to matters at Madrid. The State Department has not been in daily communication by cable with Mr. SICKLES, as has been stated, there being no exigency to warrant such a use of the wires. Furthermore, there is not a particle more reason for war now, so far as our diplomacy is concerned, than there was six weeks ago. The relations of the two parties stand the same. The excitement on the other side is because the Spaniards have found out, or think they have, what was really proposed nearly two months ago. The Cabinet will hold its first meeting since the return of the President, to-morrow, and all the members will be present. Cuba, not SICKLES, will very likely be discussed. The attitude of this Government on the subject of recognition is unchanged. It is not yet deemed justifiable, and there is, therefore, no backing down. The coarse and outrageous attacks on our Minister in the dispatches of the Democratic organ in New-York, excite sympathy for him, even among his opponents. The fact that the dispatch fraudulently purports to come from Washington, is in keeping with its indecent character. It was written in New-York.

VENEZUELA.

A Mutiny Among the Soldiers Excited by Politicians—A Desperate Attack on Their Officers—Friendly Bonchamente of Troops Fire on Each Other—Quiet Restored.

From Our Own Correspondent.

CARACAS, Tuesday, Sept. 7, 1869.

On the 18th of last month a desperate attempt was made by the enemies of the Government to get up a revolution in this city. The conspirators, it appears, bribed with money some forty or fifty soldiers of MONAGA's division, and it was settled that on the evening of the day in question these soldiers should mutiny and kill their officers, after doing which they should call upon their comrades to join them, and sallying forth seize all the Executive members of the Government and hold them prisoners. They faithfully carried out the first part of their agreement, and succeeded in killing Colonel DURANO and the corporal blower, but the firing of guns at the headquarters of San Carlos gave the alarm all over the city and the authorities were promptly at their several posts of duty. General ROMERE, the commanding officer of the division, also hastened to the scene of the disturbances, and threw himself into the midst of the rioters, heedless of his personal safety. The designedly officers immediately called a meeting of the ministers to decide upon the measures required by the urgency of the case. The prompt action of the Government was warmly supported by the zeal of the people, and large numbers of citizens hastened to defend the cause of law and order. Unfortunately, through a sad mistake, two detachments of soldiers marching from opposite directions fired upon each other, and Colonel ANDRES, the commander of one of them, was killed on the spot. ANDRES was highly esteemed, and his death greatly excited the people. The mutineers having taken to fight, troops were stationed in the different parts of the city. Besides these, 1,500 citizens of Caracas remained under arms the whole night. About midnight the excitement subsided. Had any of the well-known opponents of the Government shown themselves, they would certainly have been killed by the enraged populace. An excited crowd went to the house of Dr. URBUTIA, who, to escape their fury, had to jump over the wall of his garden and take refuge in a neighboring house. As he was suffering from heart disease the excitement was too great for him, and he died shortly after. By the evening of the 19th the city had become perfectly tranquil, and has remained so to the present time.

General MONAGAS has left for Maracaibo, with 2,000 men, four steamers and several schooners, to attack PULGAR at that place.

WALL-STREET.

Extraordinary Fluctuations in Gold and Stocks.

The Struggle of the Bulls and Bears.

Notes of a Reporter on the Issues and Speculations of the Street.

WALL-STREET YESTERDAY.

The Causes of the Excitement—A Powerful Clique at the Bottom of It—The Rise Unwarranted by the Condition of the Country.

The excitement in Wall-street yesterday was even greater than on the previous day, when the "street" was suddenly startled by the rapid descent in the price of Central Railroad stock, and the equally rapid advance in the quotations of gold. The violent movements of Wednesday, however, had prepared operators for a "heated term" yesterday, and early in the morning—at least two hours before the opening of the Gold Room and the Stock Boards—brokers and their customers began to make their appearance around the central points of attraction, and the adjacent streets and purlieus. By 9 o'clock the belligerent parties in the gold speculation had begun to take shots at each other, and it appeared from the outset that the bull side had an advantage which they were likely to hold during the day. Transactions were at once made at 143½, or more than one point above the highest figures of the day before; and though at the regular opening of business, the quotation was one per cent. below what had been previously touched, yet the bull party soon showed that they had not exhausted their strength in this struggle on the previous day. In a short time, amid intense excitement, the price began to rise, and it sold rapidly up to 144 and 144¾—the highest point reached during the day—the fluctuations meantime being rapid and frequent, and the changes hither and thither often covering one or two per cent. in the course of a few minutes. During the whole day the Gold Room was the arena of an uproar that could only find its parallel in previous scenes of a similar kind in the same locality. The bear party at times seemed to be perfectly frantic while undergoing punishment at the hands of the exultant and defiant bulls; and, as the roar of battle and the screams of the victims resounded through New-street, it seemed as though human nature was undergoing torments worse than any that DANTE ever witnessed in hell. In stock operations the day was hardly less exciting, and Central was of course the principal point of interest, as it had been on the previous day. The fluctuations were less violent than those of Wednesday, when they covered 28 points, but still they were sufficiently wide, (93 to 91,) as will be seen by our regular stock report, to arouse operators and interested parties to their most determined efforts on one side or the other. The whole railroad list was affected, and in the more active stocks the movements were large and varied; but, as we have said, the changes were most deeply felt in Central, and other "Vanderbilt" stocks, such as Hudson River and Harlem, and in such semi-Vanderbilt lines as Lake Shore and Michigan. It is but little over three weeks since Central was quoted at 226, and the downward movement has been by fits and jerks till Wednesday, when the great and terrific descent occurred. Throughout the afternoon, the Long Room was constantly crowded by a "mob of gentlemen" who manifested themselves in a state of enthusiasm for surpassing anything we ever witnessed, either at a Southern camp-meeting or a Havana cock-fight. In fact, the condition both of the Long Room and the Gold Room was vividly and accurately described by an ingenuous rustic on the steps of the Gold Room, who, when asked by an excited operator what were the features of the market, replied, "Simply howling."

We were told by brokers that never, since the war times of 1864-5, had they seen the street in such a state of perturbation as during the last two days; and it is more than likely that to-day will see a continuation of the "heated term." Crowds were inside the rooms and outside—crowds were standing here and there—crowds were constantly hurrying to and fro in all parts of New, Broad, Wall, Nassau and William streets.

Old operators in the street say that the bull clique which now controls the gold market is the most powerful clique we have had in gold since the war—if not the greatest that has appeared since gold went above par eight years ago. The names of parties who are supposed, if not positively known, to compose this clique are freely mentioned; but we do not propose to injure any man's reputation here by accusing him of being a member of the Ring. Of course it is to the advantage of this clique that the largest stories of their power should be circulated, and that the wildest schemes in regard to gold should be attributed to them. They are thus enabled the more effectually to carry out their purposes, and to strike their adversaries with dismay.

That the rise in gold during the last few weeks—including the sudden advance of the last two or three days—is the work of a clique or ring, is perfectly well known. There is nothing in the condition of the country, or in its relations, to justify the extraordinary appreciation of the premium. "It is the scheme of a clique exclusively," said one intelligent broker; "nothing else whatever." And he considered that this was demonstrated by the facts: 1. That exchange on London is plenty at 108 to 108, which would afford a handsome profit for the importation of gold from Europe at present prices; it being, moreover, well known that a million of gold or more is now on the way here, and still more has been ordered. 2. The parties who hold the gold in this market are paying an eighth per cent. a day for carrying it. These two facts he considered to be in themselves conclusive as to the nature of the present bull movement.

This clique have been engaged in their operations for months. They bought gold when it was at 140—and they bought it all the way down to 131¾—and then they kept on buying it as it went up again, their purchases being especially heavy some time ago when it was at 134; and at present they seem to have control of all the gold in the market and in the banks. During their operations they have made "turns" now and then, as their necessities or their interests dictated, "realizing" from time to time wherever it was possible to make a profit. This they have done cautiously and quietly, while they have made their purchases loudly and openly. It is understood that when they commenced their more active bull operations at 134 in the earlier part of the month, the clique held at least forty millions—either in gold itself or in the contracts of parties who were short to them. Although they have bought largely every day since that time, it is supposed that they have sold and settled with those short to them to fully as large an extent as they have bought—so that at present they actually hold no more than when the price was 134. In the meantime, as we have already said, they have realized large profits from these sales and settlements—expecting, of course, to lose ultimately upon what they have on hand when the market breaks. That it will break before long, is believed on all hands, and this is argued from a variety of points, such as these: (1.) We have exported forty millions less thus far this year than we did during the corresponding period of last year—while our production of the precious metals has been fully as great as last year. (2.) Exchange is now four per cent. below the point at which gold can be profitably exported. (3.) Our enormous crops of cereals and cotton will soon be on the market, and supply all the exchange wanted without shipping any gold this Autumn or Winter. (4.) The gold interest due from the Government during the next three months is nearly sixty millions—which will mean more than supply all demands for Customs, and so forth.

On the other hand, the bulls argue—"Well," says one of them, "we have no argument—only, we can put it up higher, and intend to do so." But, at the same time, there is no doubt that some of the bulls are sustained in their movement by the idea that the relations of our Government with Spain are now very critical, and will probably soon be more so. This rumor was used on Wednesday, and yesterday again the bulls tried to bolster up their cause with it.

It is also believed in the street that it is the same bull-gold element—though perhaps not precisely the same combination—that has been engaged at the same time in the movement for bearing stocks. It is said they have sold out their stocks in order to get the means of carrying on their operations in gold; and now, being short in stocks, they are bearing the market in order to buy back advantageously, when, by getting out of gold, they have the means to do so. That the parties have acted in concert in the tremendous undertaking they have lately carried out—and which is not yet consummated—is a matter about which, though little is positively known to outsiders, there is no occasion to entertain any doubt.

But we will not attempt any further to recapitulate the opinions, theories, fancies and rumors that have been entertained by different parties in Wall-street, concerning the determined and aggressive clique which is now executing its own ends at the public expense, and in so far as reports and speculations are herein set down by the present reporter, he relieves himself from all responsibility concerning them, further than to say that they are among the things said by parties in the

THE ANTHRACITE STRIKE.

Close of the Protracted Struggle—Extent, Capacity and Development of the Anthracite Fields—The Great Companies and Small Operators—Preliminary View of the Basis Question—Domestic Condition of the Miners.

From Our Special Correspondent.

SCRANTON, Tuesday, Sept. 21, 1869.

The long strike of the coal-miners has become as completely a thing of the past as the Avondale disaster, which, with terrible emphasis, marked its culmination in the northern coal-field. The struggle of fourteen weeks between operators and miners, which was conducted on both sides with extreme bitterness, having now been followed by a truce, if not enduring peace, and the passions roused by the struggle having somewhat subsided, it is proper that the public should review the affair in all its aspects, in order, if possible, to discover the cause of those suspensions that for two successive years have disorganized, if not paralyzed, one of the chief industrial pursuits of the nation.

THE ANTHRACITE POWER.

The anthracite coal-fields of Pennsylvania constitute a great power in the land. Comprised in the Counties of Luzerne, Carbon, Schuylkill, Northumberland, Columbia and Dauphin, they underlie 470 square miles of valley and mountain, and so far as yet discovered contain the only anthracite deposits of the continent. Within easy access of the great commercial and manufacturing centres of the nation, and in the midst of an old and thickly settled region, they are the sole reliance for fuel of nearly 15,000,000 of people. Capable of supplying the present and prospective wants of the people for probably two hundred years, and of being mined and got to the consumer with comparative ease and cheapness, the peculiarity with which capital has been employed in their development is not a matter of wonder. Throwing out the estimated value of the coal lands, and money to almost fabulous amounts is found to be invested in coal production. A little more than $40,000,000 has been absorbed in mining capital, about the same sum in canals, and $70,000,000 in railroads, both being constructed almost solely as means of transportation for coal. The northern coal-field is almost entirely absorbed by three great corporations, or monopolies, as it is the fashion to call them, but in the whole anthracite region are about 200 firms and incorporated companies, working two or more mines each and sending into market during the past year 16,000,000 tons of coal; but in doing so draining the fields of about 20,000,000 tons, mining being yet in a crude state, and the wastage unnecessarily great. Of the market production nearly 9,000,000 tons were sent by the three great companies—Delaware, Lackawanna and Western, Delaware and Hudson and the Pennsylvania Coal Company. The vastness of the coal interest having been told, the immense power of these three great corporations can be imagined, and the meaning and origin of the phrase "small operators," heard everywhere in the coal regions fully explained. In the presence of these Titans ordinary giants are dwarfed, and men who can do business merely by the half million are small operators.

Among those conversant with the trade there is no assured inquiry to know upon what meat these Cæsars fed to become so great. They have spread their regimen before the whole world, which has seen them assuming colossal proportions because they were carriers as well as producers of the black merchandise in which they traffic. Especially is this true of the Delaware, Lackawanna and Western, which, year after year, towers more and more above its fellows, buying, building or leasing new railroads, absorbing more mines, and making denser every year the shadow in which its rivals wither. But the three great companies make common cause against the "small operators;" crush them in the market by putting cost there cheaper than they can, and hamper them in their dealings with the miners. I can scarcely make a positive assertion about anything connected with the coal troubles, but there can be little doubt that in the undeniable facts which have been stated are the roots of the whole evil. The public can, however, best judge the question by going, briefly as possible, over the whole field.

THE BARS TO PROGRESS.

Whoever attempts to honestly investigate the troubles of anthracite production is met by one almost insuperable difficulty at the very beginning of the undertaking. At every step he is encountered by the most positive assertion and as positive denial, neither being often supported by the least particle of proof, and he never even casually stumbles upon an admitted fact. It is all the same whether he be in pursuit of a guiding principle, a central event, or a trivial detail, and as evidence cannot be sifted and weighed, conclusions cannot be trusted. But true as all this is generally, it may be safely said that the short-lived strike of 1868, and the protracted suspension of 1869, were equally incidents of a long-pending, perhaps unacknowledged, but bitter and clearly defined struggle between the great corporations, the small operators, and the miners, in which the two latter, although not avowed allies, were struggling in a common cause. The strike of 1868 was made for the eight-hour system, and was a failure; the suspension of 1869 was in behalf of "basis," and, practically, was equally abortive. Perhaps the power and prestige of the great companies cannot be more plainly shown than in this brief recital of results. It remains to show how they used their victory, as well as how their antagonists waged the warfare, and how they profited by the result. But, before entering upon that field of uncertainties, where each side must tell its own story to be taken for what it is worth, a general retrospect will not be unprofitable.

HAZARDS OF MINING.

Anthracite mining is undoubtedly less hazardous than burrowing in the small coal veins of England and Wales where work can only be done in an unnatural posture, but it is far from being the most safe, healthful or pleasant of industrial callings. The one shaft system which so largely prevails is only one of the many dangers constantly threatening the anthracite miner in common with all his fellows, the world over. The roofs of mines sometimes fall, crushing the toilers; the galleries and chambers are liable to be filled with gases deadly to the occupants, and these are but chief of many perils that beset him who descends into the bowels of the earth. And while the calling is hazardous, it is as certainly not healthful. I have not yet had opportunity to gather any statistics on the subject, but at this moment I recall the fact that I have seen but one miner in all these regions who showed signs of age. Some, indeed many, of the witnesses at the Avondale inquest, it will be remembered, spoke of having been many years in the mines, but they all entered them when mere lads, and it is the universality of this misfortune of the sun falling heir, in tenderest childhood, to the father's portion of toil, that makes the mines premature graves for thousands.

The miner intuitively knows all these things, and there has always been in his mind an idea, vague, perhaps, but sufficiently defined for its purpose, that such toil as his demanded something more than ordinary recompense. He could not, indeed, justly claim that his was skilled labor, for the art of mining, so far as the actual miner is concerned, is as rudimentary as that of chopping wood, but he could lay stress on its attending dangers, and ask some guerdon for them.

CONDITION OF THE MINERS.

The miners have claimed, and prior to this year, that they have not been equitably paid. Perhaps the general public may have some difficulty in collating the data necessary to decide upon the justness of this claim, but there are certain facts easily ascertained, which may aid in reaching a conclusion. There can be no doubt in the first place that as a class the miners are frugal. They waste little in riotous living, but nurse their incomes with wonderful prudence. The wife slaves in the house, while the husband digs in the earth, and at the twelfth year, and sometimes before it, the boy children descend the perilous shaft with him to become producers. If all this labor were fairly paid, all this frugality would naturally result in stowing this family away in a residuum of accumulated substance sufficient for comfort and to meet the hazards incident to human life. But nothing is more certain than that the miner rarely accumulates a competence, and that his home life is surrounded with few of the comforts of civilized existence. I have been this year and last in hundreds of mining villages, and without being intrusive the domestic life of the villagers has been opened to me. Everywhere in Summer months the doors and windows are open, and the houses are not so extensive nor so tastefully furnished that a single glance will not serve to inform the observer of the interior and its contents. Generally the houses are nothing more than huge boxes with doors and windows; always they are the most primitive of frames which the sometimes neatly painted or whitewashed, but never entirely hide. Very rarely indeed have I seen one of these houses provided with the accessories that decency and comfort demand; rarely the single doors adequately uncovered, although a cheap carpet is sometimes seen on the floor; rarely a stove, a scant array of common crockery, a deal table and three or four wooden chairs, make up the furniture of the living room. Bedrooms rarely have anything in them but a bedstead of cheap pattern and manufacture; but I have noticed that usually the beds themselves, together with the linen and clothing, are of excellent quality and abundant—the one extravagance of the miner appears to be the pardonable one of providing himself and dependents with the appliances of comfortable slumber. But aside from this everything about his home is cheap and scant; at a forced sale probably his whole stock would not realize $100.

In the personal adornment of himself and family, he is equally chary of expense or equally unable to bear it. The women and children about the villages are clad in the simplest garb and cheapest materials, while the miner himself when at work necessarily wears the roughest and strongest of suits. When in holiday attire, all present a respectable appearance; but it does not require very close observation to learn that no very costly fabrics have entered into the make-up.

Add now these other facts, that the miner rarely owns a foot of the soil or the house in which he lives, or is in any way beforehand with the world, and the inference is clear that his wage must be small. True, as a rule, his burdens are many, for his wife is prolific, and a house without a half dozen children is generally that of a couple married a less number of years; the rule appears to be a child for every year of matrimonial life.

Partly from the clashing of millions of dollars in a great business rivalry, and partly from the squalor I have sketched, arose the long strike of 1868 and the demand for "basis." The history of that strike in its inception, progress, culmination and results, remains to be told. There has been no recent event more important in itself, more widespread in its effects, or more dramatic in its incidents. It paralyzed a vast industry, and affrighted great cities; it heated men's souls into a white heat, and when the conflict raged destroyed for the time man's faith in man. A contest of this character deserves a recital more coherent and extended than the cursory mention it has thus far received. E. C.

Anthracite Coal Consumption and Supply—Does the Present Rate of Production Forebode Deficit or Over-supply at the End of the Year—The Effect of Withholding Orders.

To the Editor of the New-York Times:

Whatever opinion may be entertained touching the miners' strike in the anthracite districts in this State, the practical question with the public is: Does the recent and present rate of production forebode deficit or over-supply at the end of the year?

To lead the reader to a approximately sound conclusion, the subjoined table is submitted, showing the quantity of coal forwarded to date this present year, and also for the corresponding time last year, over the works of the seven great corporations that jointly supply the seaboard market.

The tonnage of the Philadelphia and Reading Railroad and the Schuylkill Canal is to Thursday, Sept. 16, and of all the other lines to Saturday, Sept. 11, the official week terminating at above respective dates:

	1868. Tons.	1869. Tons.
Phila. and Reading Railroad	1,447,226.07	1,324,724.01
Schuylkill Canal	621,221.05	425,425.06
Lehigh Valley Railroad (inc. M. Chunk Canal)	1,229,246.00	1,189,042.00
Lehigh Canal	355,308.12	352,025.14
Lehigh Canal Company's Lo.		
Mauch Chunk)	354,728.00	354,228.12
Del., Lackawanna and Western Railroad, North Division	324,779.14	324,627.00
Del., Lackawanna and Western Railroad, South Division	725,128.00	727,022.00
Delaware and Hudson Canal	1,251,222.00	630,022.00
Delaware and Hudson Canal Company's Railroad	....	195,720.00
Pennsylvania Coal Company	631,272.15	631,272.15
Total	6,620,514.00	6,261,574.00

	1868. Tons.	1869. Tons.
Phila. and Reading Railroad	547,227.14	....
Schuylkill Canal	....	136,063.10
Lehigh Valley Railroad (from Mauch Chunk)	....	69,222.01
Lehigh Canal	....	32,174.01
Lehigh Canal Company's Lo.		
with such Company's Rail'd	329,675.12	....
Del., Lackawanna and Western Railroad, North Division	....	120,022.14
Del., Lackawanna and Western Railroad, South Division	....	174,022.00
Delaware and Hudson Canal	....	322,171.00
Delaware and Hudson Canal Company's Railroad	195,720.00	....
Pennsylvania Coal Company	32,250.12	....
Total	905,452.00	1,053,025.02
Decrease		628,412.00
Net decrease		77,049.00

During the year 1868 the coal tonnage of said lines was 12,280,701
Deduct tonnage for 1868, as above, to date 6,261,574
Yet to be supplied to equal last year 6,019,027

It must be remembered, too, that but fifteen and a half weeks of the calendar year remain from the middle of September; whereas from Jan. 1 to that period covers thirty-six and a half weeks; also, that canal navigation, which is sometimes suspended as early as the middle of November, is always closed in December.

Now, if to this 6,019,027 tons yet to be forwarded, we add the average ratio of annual increase of anthracite consumption, it will be ascertained that five millions of tons will be needed to satisfy the necessities of the market for the current, from and after date in table.

The progress made in the annual consumption of anthracite will be understood on consideration of what follows:

	Tons.
Total amount of coal carried by the seven forenamed competing companies in 1868	12,280,701
Total amount of coal carried by the seven forenamed competing companies in 1867	11,172,926
Increase for 1868 over 1867 (10 3-10 per cent.)	1,206,416
Quantity carried by said companies in 1861, in which the war began	8,122,612
Quantity carried by said companies in 1868	12,280,701
Increase during four years of war (51 per cent.)	4,072,577
As the increase of 1868 over 1861 was 1,861,089 tons, equal to an annual average increase of 467,139 tons during four years of civil strife, and as, moreover, the market in 1868 consumed 1,206,416 tons more than the production of 1867, surely the market for 1869 will need a large excess over 1868!	

Inasmuch, however, as last week every line forwarded to market a less quantity of coal than was forwarded in corresponding week of last year, it is manifest that the recent suspension of orders for coal on the part of consumers and dealers was an error which renders a rush for coal inevitable so soon as the actual danger of scarcity shall be commonly realized as an impending fact.

Last year, from the last of August to the close of the year, the coal movement was heavy and the trade active. This year, September is passing away, and notwithstanding that a deficit exists and a panic is imminent, still buyers hold back, thus threatening to cause stagnation, at the very time activity should be the rule and precaution against famine the object.

	Tons.
As already shown, the quantity forwarded by the seven competing carrying companies in 1868, was	12,280,701
In 1861	8,122,612
Increase in seven years, (50 per cent.)	4,158,134

Since 1861 two new lines have been added to the seven outlets then existing, from the anthracite territory to the tide-water market; but these two new lines are railroads built by predisposing canal companies, so that while the carrying lines have been increased, the carrying corporations have not been increased.

And while the Lehigh Canal Company and the Delaware and Hudson Canal Company have thus increased their capacity by building railroads, the railroad companies have increased their capacity by terminal enlargement, by extensions to new collieries, and by new tracks, sidings and equipments.

Thus the Philadelphia and Reading Railroad, which in 1861 carried [illegible] tons of coal in [illegible] a million tons of coal, and in one year [illegible] 4,000,000 tons of coal—its coal tonnage for the year to Sept. 16 having reached 2,[illegible] tons, being 547,[illegible] tons ahead over corresponding time last year.

On the subject of railroad capacity a heresy seems to possess the public mind, to the effect that, in some cases, a maximum has been reached. To disabuse such victims of error, we will cite the example of the Lancashire and Yorkshire Railway Company in England, over whose road in the month of June, 1869, there were carried 1,809,792 tons of coal!

The capital expended in the works of the Lancashire and Yorkshire Company to June 30, 1869, amounted to $114,430,825!

The expended capital account of the London and Northwestern Railway Company, (which operates 1,452¾ miles of road,) to June 30, 1869, was $261,008,336!

Compared with roads in England, France and elsewhere, the tonnage capacity and investment of American railroad companies assure the continued expansion of the latter in the field of transportation, which in England is an island two hundred miles across, in America a continent three thousand miles across.

The fact that seven competing anthracite carrying corporations transported in 1868 eighty-eight per cent more tons of coal than in 1861, exhibits a ratio of expansion that assures vast ultimate aggregates.

	Tons.
For the month of August, 1869, the coal tonnage of the Philadelphia and Reading Rail. road, was	[illegible]
For the heaviest month in 1861, June	179,[illegible]
Increase (187 per cent.)	[illegible]
The largest tonnage in the Philadelphia and Reading Railroad in any one week this year, was	132,[illegible]
Largest tonnage for any one week in 1861	45,[illegible]
The gross earnings of the Philadelphia and Reading Railroad for the biggest month in 1861, amounted to	$[illegible]
The net profits for August, 1869, exceeded	$[illegible]

The simple truth is, the capacity of the seven named corporations for transportation, and the capacity of the collieries for production, is in each case in excess of the capacity of the market for consumption. It is because there is a surplus of mining labor employed in the anthracite regions, that wages and prices fluctuate and strikes occur. Consumers withhold orders to cause a glut and stagnation, and then when scarcity ensues from suspended production, prices advance in the market and higher wages are demanded at the mines. The festivity and higher prices which are likely to prevail in October and November—certainly in November and December—will be in consequence of the recent and present withholding of orders by consumers who have not yet stored away a supply of coal for the Winter, but who must soon give orders, else will navigation be closed and Winter and high prices be upon them.

PHILADELPHIA, Monday, Sept. 20, 1869.

OVERLAND TO MONTANA.

Interesting to Adventurous Parties—Letter from Captain Lincoln—How to Get to the Gold Fields—When to Go and How to Go—The Cost—Valuable Suggestions.

To the Editor of the New-York Times:

In 1863 I was Captain of a party of about two men going to the gold fields of British Columbia, traveling the most northern route, and the first party who ever went that way. I have been written to by many young men wishing to go overland to Montana, and wishing me to be their guide, &c. Also, asking me the cheapest route and least expensive, and time of starting. I therefore deemed it most advisable to give them such information through your valuable paper if you will kindly insert the same.

The proper time to go overland the way I went would be June or July, and the cost about $100 in currency. My starting point would be St. Paul, Minn., then take BURBANKS' stage across the plains to Red River, thence by steamboat to Fort Garry, paying about $60. At Fort Garry purchase horses, outfit, &c., for the journey. This would be along the Saskatchewan Valley, from Fort Geary to Fort Ellice, crossing the south branch of the Saskatchewan River; thence to Carlton House, Fort Pitt and Edmonton House; from Edmonton House southward 200 miles to Colville. Once at Colville the party can go any direction they want, and to any of the mines—Montana, Idaho, Boise, &c., &c.

When we journeyed across in 1863, each one took a horse and cart, or ox and cart, paying about $60 in gold for the lot. This was early in the year 1863, and after we had started from Fort Garry we traveled slowly, being two months going to Edmonton. We passed through the Rocky Mountains and down Fraser River to the Gulf of Georgia, and nearly all of us wintered in Vancouver Island, thus traveling a distance of nearly 4,000 miles by land and water, at an expense of, to some of us, nothing, as we got cattle along the way, and sold them for as much as the entire journey cost. Many of the persons writing to me are anxious to go now, to be in readiness in the Spring for work at the different mines they may go to. If so, there is no time to be lost, and the party should start not later than the end of this month. Being late in the season, I should advise that no carts be taken, but for each person two horses, one to be ridden, and one to carry provisions. In this way 120 miles a week can easily be made, resting every Sunday. It is a splendid country to pass through. In 1863 we killed as many as twelve buffalo in a single day. If a cart is taken, load it with about 200 pounds of food, sufficient for the journey. Perhaps the journey could be made just as quickly, and, on second thought, perhaps it would be best and be a saving of the cost of an extra horse. In 1863 we average only about twenty miles a day, but then we were loaded with at least 1,000 pounds to a cart.

A party of young men wished me to go with them as their guide this Summer, but owing to pecuniary affairs I was not able, although I should have been delighted, as I consider the country one once pays one, and I am sure he will never forget it nor regret his undertaking. I should have no hesitation of going with about one hundred men. There is not the slightest danger. We pass through the Cree Indian country, a friendly tribe in the British possessions. The expenses for each person would be about as follows, viz.: to St. Paul, $20; from St. Paul to Fort Garry, $60; horse and cart, $70; guide, &c., $5, in all $155, with provisions. At the journey's end the horse would be worth $70 or $100. I am speaking now of a journey to Colville. Here you would Winter and be near any of the mines for the Spring, where plenty of work is obtained, at least I have always found it so. Now contrast the other way of travel, by San Francisco. From New-York, in steerage, $70; expenses in San Francisco, $10; steerage by boat to Portland, $25; from Portland to Boise, Idaho, or Montana, from 300 to 500 miles, at a cost by steam and land travel of $200; and this in gold, amounting in all to at least $300. By way of Missouri River to Fort Benton, (the boats going about three times a year,) by boat, $70; about six weeks or two months going up the river, with all the danger of the Black Foot Indians on either side, and then 400 miles of travel through the same Indian country. Horses are very dear; also provisions. The two latter would cost you at least $150, amounting in all to about $400 in gold.

As dangerous as this way of travel is, I would prefer it to the way of San Francisco by water, especially in a steerage, for only those who have experienced it as I have does know what it is. If persons wishing to go will form parties and appoint their Captains, such Captains to correspond with me, I shall be pleased to give them all necessary information; and if they wish to make proper arrangements, I have no hesitation in becoming their guide; but it must be done without delay, as I would advise none to go the way I propose later than the end of this month. S. LINCOLN.

Since writing the above I have perused my diary of 1863, and, from the lateness of the season, I am of opinion it would be best for the party to Winter at Fort Edmonton, and not attempt any danger by passing through the Rocky Mountains to Colville till early Spring. It will be best, therefore, to take more provisions, such as flour, tea, rice, sugar, &c., and any little trinkets to trade with the Indians and half breeds, of which there are hundreds, and of which quantity of meat can be obtained. The country abounds in game, and any quantity can be had with ammunition and rifle. There is a settlement of half breeds [illegible] miles from Edmonton called Lake St. Anne. The Indians abound in white fish. A Catholic priest resides there. He is a kind man. The cattle feed all the Winter in the woods. Any amount of buffalo meat can be had for killing; in fact, it costs next to nothing to live there, and any one who is not too idle can trap plenty of marten and other furry animals, and find a ready sale at the Hudson Bay Store. S. L.

POST OFFICE, NORFOLK, Va., Monday, Sept. 13, 1869.

A TERRIBLE DISASTER.

A Train on the South Carolina Railroad Precipitated into the Congaree Swamp—The Engineer and a Fireman Killed, and Another Fireman Wounded—The Cars Consumed by Fire—Horrible Death of Engineer Hargrove.

From the Charleston (S. C.) News, Sept. 23.

AN accident by which the lives of SHERON HARGROVE and JAMES GILBERT were lost, and a considerable amount of property destroyed, occurred near Kingville to the night express train of the South Carolina Railroad about 4 o'clock Saturday morning. The train, consisting of the locomotive "W. C. Dukes," tender, ten loaded and two empty freight cars, baggage and conductor's cars and two passenger coaches, was on its way to Columbia, and, having crossed the Congaree River, was moving slowly across the trestle over the Congaree Swamp, when suddenly the engine plunged down into a gap in the trestle, the tender and the twelve freight cars followed, and all in a moment lay a mass of ruins. The conductor, Mr. W. H. EVANS, who was in his car just in front of the passenger coaches, felt the shock caused by the fall of the engine, and immediately sung out to the brakemen to put the brakes on, which they did, and thus saved the passenger and conductor's cars from going over, the front one of these stopping within a few inches of the break.

THE KILLED AND WOUNDED.

All this occurred in a moment. Before that portion of the train left upon the track was stopped, the cries of the wounded were heard. Those who were unhurt jumped from the trestle down into the swamp, which, owing to the recent dry weather, was comparatively dry, and proceeded in the direction of the cries. The first man they met was Mr. CHARLES H. BURNS, one of the firemen, who was sitting on a log to which he had crawled after falling. He had received a severe cut across the forehead, and was severely bruised in other portions of the body. He was put in a chair to which a rope was attached, and hauled up upon the trestle and attended to as well as circumstances would permit. While this was being done, others were endeavoring to aid the engineer, Mr. HARGROVE, whom they found lying on his side, jammed in among some of the machinery of the locomotive, which, however, might have been easily removed had it not been for the weight of the cars of a freight car which had fallen upon it. Messrs. T. WYMAN, engineer, SYMMES, conductor, Mr. SAYLES and JAMES MAGUIRE, train hands, and others, first attempted to remove the wreck of iron and wood by which the man was being crushed, the pressure being upon his loins. This was futile, and an effort was made to break the iron with an ax, but it also was found blunted. Then, however, the workers seized some spades which were among the freight, and endeavored to dig the dirt from under him, hoping by this method to get him out, but the wood and iron which appeared to have enveloped the lower portion of his body prevented them from carrying out this plan. After they had worked for several minutes, with the result above stated, the cry of fire was raised, and the assemblage was startled to see the flames rising from the wreck of the cars. The fire in a moment had enveloped the kerosene oil and whisky barrels, and they commenced to explode with a loud noise. Some of the passengers, at the request of the conductor, who feared for the safety of the cars on the trestle, went with him and shoved them out of reach of the flames. Those who were working for the man, hearing the cries and noise of labors when the fire began, for they recognized the fact that if he were not released very soon he would be burned to death before their eyes, and they worked with renewed zeal. They worked with spades, axes, levers, and some, in their anxiety, tore up the dirt from around him with their fingers; but, alas, all in vain. The fire steadily approached, the heat increasing every moment, until at last the workmen were compelled to leave the unfortunate man to his fate. He saw that he was doomed, and told those who were busily working around him that it was useless to do anything further. At this time Mr. SYMMES, who had stepped aside for a moment, came up. HARGROVE recognized him, and exclaimed, "Oh, TOM, come here." Mr. SYMMES went as close to him as the fire would permit, as he came

of Cruelty to Animals. We are assured that every effort will be used to bring offenders to justice, in whatever part of the State they may be found, guilty of cruelty to animals.

Mount Vernon and its Guardians.

The ladies of the Mount Vernon Association gratefully acknowledge the following contributions of articles of agriculture and furniture, at their valuation, received since the last publication:

C. G. Crane, $7; Mr. Gould & Son, $5; Gellff & Co., $5; N. N. Halsted, $45; Mrs. James S. Taylor, $20; Heath & Drake, $7 15; J. S. Woodruff, —; Wm. Plume, an ancient piece of embroidery; Isaac Gaston, $15; Adriance & Platt, New-York, $5; Wright & Mc-Cline, $15; J. H. Rice, $25; Taylor & Ketchum, New-York, $1 50; Peck & Walker, New-York, $20; Grifing & Co., New-York, $9 50; G. Rosbaud, $1; Brown, Harris & Hopkins, New-York, $6 05; Sturgis Cornwall, New-York, $15 25; A. W. Otis & Co., New-York, $20; R. Graves & Co., New-York, $25; Christy, Tennant & Co., New-York, $20 20; Alexander Brown, New-York, $5 25; Mr. Sorenson, New-York, $1; Dey, W. & Son, $14; De Will Stephens, $1; Edward P. Wade & Co., New-York, —; E. Cheever Holloway, $15; Patten & Hope, New-York, $27 50; Miss J. F. Mosrie, $2 50; Chas. A. Burns, $1; Mr. Sopter, $1 25; Hoyt's Sewing-silk Manufacturing Company, $5 25; Mrs. Grace Van Rensselaer, large chairs and two small ones; Mr. Thomas & Jackson, New-York, $17; Jewett & Co., $8 25; E. S. & J. Turney, New-York, $5; Chas. W. Mason, New-York, —; Mrs. J. R. Ogden, $15; Warren & Bryan, $10; De Witt Brother & Co., $4; Barbour & Co., New-York, $10; Wm. Wright, $10; James A. Roosevelt, New-York, $27; Noel, Lane & Arden, Stamp Cross, $14 25; A. S. Thorp & Co., New-York, $2 25; J. Westenborough, New-York, $5; Howard & Morse, New-York, $5; D. C. Corbin, New-York, $5; W. L. Washburne, New-York, $14; W. Bailey, New-York, $5; R. A. Moon, New-York, $2; C. G. Campbell, $5 25. We gratefully acknowledge the receipt of a full suit of clothes of General Washington, from W. D. McCreight, Hudson City.

CASH DONATIONS.

R. H. Brown, Laramie City, $5; Cincinnati Lodge, Morristown, N. J., $25; Mrs. W. Wright, $5; Mrs. Pennington Whitehead, $5; Mrs. J. B. Fell, $5; Mrs. De Grasse Bowne, $5; Mrs. Jacob Halsted, $10; Charles N. Beck, $10.

The thanks of the Association are due to LAWSON & Co., of the Newark Express, and J. W. THOMPSON, Esq., of the Merchants' Line of steamers, for their generosity in forwarding articles free of expense.

The California Excursionists.

The California Pioneer excursion party were confidently expected to arrive in this City yesterday, but did not make their appearance. It was ascertained that the programme of the excursion trip had been changed since the start at Sacramento on the 16th inst., and that the pleasure-travelers had stopped a day at Omaha and intended to stop a day at Chicago, instead of coming directly through. It is announced by the officers of the Pennsylvania Central Railroad that the party will be here on Saturday morning.

CANTON, Ohio, Sept. 23.—The engine of a special train of cars carrying to New-York the excursion party of California Pioneers ran off the track near this place, at 7:30 o'clock this morning, in consequence of an unguarded switch. Not the slightest injury was sustained, however, by any passenger. The party may be expected in New-York to-morrow morning.

An Englishman's Views of Our Fire Department.

The Chief officer of the Metropolitan Fire Brigade, of London, Mr. EYRE M. SHAW, has written a letter to General ALEXANDER SHALER, of the Metropolitan Fire Department, of this City, in which he says:

It must be a source of great satisfaction to the inhabitants of New-York to find their Fire Department making such rapid advances under your auspices, and of honorable pride to the officers and men to have the privilege of assisting to accomplish such a result as it was my fortune yesterday to see exemplified. (Referring to his review of the Department.) I beg you to convey to your colleagues, and to all ranks of the Fire Department, my most cordial congratulations on their success.

The Leonard-street Murderer.

The proprietress of a boarding-house at No. 91 Market-street, yesterday morning called upon Captain WARLOW, at the Madison-street Police Station, and informed him that on Sunday three men, who had been temporarily boarding there, drove up to the door in a coach and removed from it to their rooms three bags, which she had now reason to suppose contained the silks, shawls and children's embroidered dresses to the amount of over $6,000, stolen from Messrs. GUTTERMAN BROTHERS and SMITH & BEAN, No. 63 Leonard-street, on Sunday afternoon. She added that the property had been subsequently taken away by the men, Piecemeal, and on Tuesday they departed, leaving the bags behind them. She professed to know nothing further concerning the men or their movements.

Board of Police Commissioners.

A meeting of the Board was held yesterday afternoon. The following transfers were made: Sergeant FRANCIS S. WEMYSS, of the Forty-ninth Precinct, to the Sub-Precinct; Sergeant WM. H. HARWICK from the Sub-Precinct to the Forty-ninth; Sergeant JOHN MCDERMOTT was made Acting Captain, and assigned to the command of the Broadway Squad, vice THEODOR S. COPELAND made Drill Inspector.

Robbed by a Woman.

On Wednesday night MICHAEL VARLEY, residing at No. 49 Bleecker-street, was robbed at No. 31 Bowery by JOANNA WEINHARDT, a Bowery concert saloon waiter girl, of $16, a check for $51 50 and his watch and chain. He gave the arrest of the girl, and the property was found in her possession. Justice HOGAN committed her to the Tombs to await a trial.

DECISIONS.

SUPERIOR COURT—SPECIAL TERM—SEPT. 22.

By Chief Justice Barbour.

Charles Starr vs. Joseph C. Potts; motion granted.

Mathew Deyo vs. Daniel Feltner et al.; motion granted.

Herman Funke vs. Charles H. Hawkins et al.; motion granted and cause referred.

William F. Harmon vs. Frank E. S. Beck; motion granted.

SUPREME COURT—EIGHTH DISTRICT.

Before a Full Bench.

MERCHANT UNION EXPRESS LITIGATION—JURISDICTION OF STATE AND FEDERAL COURTS.

William G. Fargo as President of The American Merchants' Union Express Company, Appellant, vs. James H. McVicker, Respondent.—Opinion by LAMONT, J.—Two questions are made in this case. The plaintiff claims that this action is not removable from the State Court into the Circuit Court of the United States, under the act of Congress of 1789, or the act of 1867. The defendant, on the contrary, insists that the cause is removable, and that the order of the Special Term of this Court staying the plaintiff's proceedings and sending the case to the said Circuit Court is not an appealable order. The order appealed from is affirmed, with $10 costs.

Bowen and Rogers for appellant; Geo. B. Hilliard for respondent.

SUPERIOR COURT—SPECIAL TERM—SEPT. 22.

Before Chief Justice Barbour.

HABEAS CORPUS—IRREGULAR CONVICTION.

In the matter of the petition of James Hughes.—On the 21st of May last the petitioner, an intelligent lad of about 15 years, was committed by one of the Police Justices to the House of Refuge on conviction of vagrancy. Counsel for petitioner made application for his discharge on the ground that no record of the conviction had been filed in the Court of General Sessions, as required by statute, in support of which he produced a certificate of the Clerk of General Sessions that no such record had been filed.

Counsel for the House of Refuge contended, in opposition, that the mere omission to file this record did not invalidate the judgment, and that when the omission was discovered the record might be filed *nun pro tunc*.

Chief Justice BARBOUR held that this decision could not apply to a conviction by a Police Magistrate, in which case it was obligatory to file the record as prescribed by statute in order to perfect and validate his commitment. It would be monstrous, he said, to hold that a boy might be committed to the House of Refuge and kept there month after month, with no record of his crime or conviction to which his friends might have access, or on which proceedings for his discharge might be based; and then, when a writ of *habeas corpus* is issued, it be permitted to file the record *nun pro tunc*. To keep the boy imprisoned under such circumstances would be cruelty. Draw your order for his discharge.

The petitioner was discharged accordingly.

A LOST PASS-BOOK.

John McCarthy, Executor of Timothy McCarthy, vs. The Bank for Savings, (in Elizabeth-street).—It was alleged in this case that Timothy McCarthy was lost on the steamship *Atlantic* in 1857, leaving a considerable sum of money to his credit in the bank. His brother, John McCarthy, subsequently obtained letters of administration as executor of the deceased, and alleging the bank-book to be lost, and the amount standing to the credit of the deceased being unknown to him, he makes this application for an order of discovery of the amount, in order to enable him to frame his complaint. It was claimed on the part of the bank that they had always transacted with parties named Timothy McCarty, but none of whom spelled their name with an A. They also, in one of their affidavits, state that the book was in the hands of persons to whom it was committed by the deceased, and from whom the plaintiff should rather seek to obtain it.

The Court granted the order directing the inspection of the account to be permitted, or that an authenticated copy of the account be furnished to plaintiff.

COURT OF GENERAL SESSIONS.

Before Justice Bedford.

There were no convictions or sentences in this Court yesterday. Daniel O'Brien was tried and acquitted on a charge of having indecently assaulted a little girl named Sophia Lichtenfeld. George Brown was also acquitted on a charge of having entered the hat store of H. Kohn, at No. 534 Broadway, by burglarious means, and having stolen $50 worth of hats. The Court then adjourned until 11 o'clock to-day.

COURT OF SPECIAL SESSIONS.

Before Justice Dowling.

The following cases were disposed of yesterday at the Court of Special Sessions, before Justice DOWLING:

Jas. Doyle, petit larceny, Cath. Reformatory.
Jas. Allen, petit larceny, fined $25.
Jas. McAlley, petit larceny, Cath. Reformatory.
Jos. Gomez, ass't and battery, Pen'y 6 mos.
John Trapple, ass't and battery, Pen'y 6 mos.
Fredk. W. Dellegar, petit larceny, Pen'y 6 mos.
John Foley, assault and battery, fined $20.
Alexander J. Smith, petit larceny, Pen'y 1 mo.
Peter Farrell, petit larceny, fined $20.
John Murray, petit larceny, Pen'y 4 mos.
Richard Rice, petit larceny, Pen'y 6 mos.
Patrick O'Connell, petit larceny, Pen'y 4 mos.

THURSDAY, Sept. 23—P. M.

The Gold combination advanced their bids from 141½ to 144½ ₱ cent., and without attempting to make a direct corner on the Cash Gold, which would not have served their purpose as well in the existing stringency of Money, they required borrowers to put up the difference of 3 ₱ cent. from yesterday evening and 7 ₱ cent. from yesterday morning in *their own hands*. The same game is said to be on the programme for to-morrow, if not spoiled by some movement from the Government at Washington. And intimations are current that it will be repeated until the price is forced to 150 ₱ cent. Meanwhile the difficulty is encountered by the party of the growing stringency in Money; the receipts of Gold from California and the interior of the Atlantic States, by express, to avail of the present advance, and the prepayment of the November Interest on the Public Debt which was to-day authorized by the Secretary of the Treasury. These payments, so far as the public are concerned, must be confined to Coupons, as the general registry of Certificates cannot be made ready before the middle of October. But on the Stock registered in the name of the United States Treasurer, in trust for the National Banks, there is no good reason why the Gold should not be drawn at once, abating the 30 or 38 days' interest, as this registration undergoes no change.

The embarrassments to general business growing out of this combination continue to be felt, especially on the Foreign Exchanges, and upon orders from the other side to ship Produce, and to remit United States and other American Bonds. Bankers' bills on London fell to-day to 104@105 ₱ cent., and Merchant bills to 109@109½ ₱ cent., with no real currency for either, owing to the condition of the Gold market.

Money was again close and dear to the Brokers, who paid from ¼ to ½ ₱ cent. to carry over their Stocks until to-morrow, the highest consideration being submitted to at the last hour for making up their Bank accounts. The Gold men also paid liberally to have their balances carried over, after they had marked up the price to 144 ₱ cent., but a good many parties who really wanted Gold for immediate use declined to make the full advance, except to Brokers and Bankers of undoubted responsibility not engaged in the speculation.

The Stock Exchange, although less excited than yesterday, was still feverish, and showed but partial signs of recovery. The impression seemed to be that no decided upward movement could be hoped for or relied upon until the culmination of the Gold speculation and the restoration of steadiness to the Foreign Exchanges—the latter being wholly dependent upon the former unless five or ten extra millions are let loose by the Treasury in exchange for United States 5-20s.

The Public Funds were further depressed in the forenoon, and the purchases of $1,000,000 at noon to-day for the Sinking Fund were on the average ½@¾ ₱ cent. lower than the $2,000,000 purchased yesterday. The premium paid was 27@28 ₱ cent. less than the premium at which the Treasury could sell Gold in reimbursement to-morrow morning.

The whole amount of Bonds offered to the Sinking Fund at noon to-day was $2,071,500. None of the leading three houses in the Public Funds—COOKE, FISK or VERMILYE—offered their Stocks, on account of the low prices which they had reason to believe would be proposed by other parties, because of the look of the open market in the morning. The following awards were made:

Firm.	Amount.	Price.
Humbert Bros.	$746,000	116.65@116.72
Friedman & Co.	105,000	116 @116.50
J. T. Whittingham	30,000	116.38
Heisler's Sons	84,000	116.45@116.50
J. T. Bale	30,000	116.40
Buckingham & Co.	16,000	116.36
C. D. Matthews	15,000	116.41@116.75
Total	$1,000,000	

Divided as follows:

1862s	$117,500	1867s	$130,500
1864s	326,000	1868s	79,500
1865s	341,000		
Total			$1,000,000

In the Afternoon the Funds, generally, were slightly advanced over the sales of the morning, and the 1867s advanced as much as ½@¾ ₱ cent.

The Customs Duties are feeling the effect of dear and scarce Gold. The receipts yesterday and to-day are, together, only about $700,000, although several valuable steamer cargoes arrived since Wednesday evening.

The Railway market was irregular on the whole list throughout the day, with fitful improvements at one hour, to be lost the next; but the pressure to sell was scarcely so marked as yesterday, and the leading brokers in the New-York and Western roads were, upon the whole, in better spirits. The New-York Central and Hudson River Boards of Management completed their order of consolidation to-day, but nothing is made public of the terms proposed, and which now go to a general meeting of the stockholders of both companies, called for the 1st of November, for ratification. At the close of Bank hours the reports of the Money market were quite unfavorable, which checked for a time all tendency to improved prices, but this feeling was in turn overcome at a later hour.

Late in the Afternoon the following quotations were made as compared with Wednesday night. There was an expert demand for United States 5-20s of 1862 and 1865, (old,) notwithstanding the difficulty in placing the Exchange. The Railways at the latest hour were much depressed again. After regular Bank hours extravagant commissions were paid for the use of Money to complete some of the Bank accounts:

	Wednesday.	Thursday.
United States 10-40s	109⅛	109⅝
United States 5-20s of 1862	121⅛	122⅛

The *Evening Post* has the following of a failure among the Brokers this Afternoon:

"The failure of VANDEVENTER & Co., a small stock brokers' firm, was announced to-day at the 1 o'clock call, by letter to the Stock Exchange from one of the clerks of the firm. According to this letter, Mr. HEADLEY, the office partner, has absconded with the assets of the concern. Mr. VANDEVENTER, it appears, is in St. Louis, and has been telegraphed to return home. The exact condition of the firm's affairs cannot be determined until VANDEVENTER returns."

Chicago and Northwestern Railroad earnings:

Third week September, 1869	$355,207 44
Third week September, 1868	294,612 56
Decrease	$60,595 00

Of the Albany Lumber trade the *Argus* says:

"Since our last report business has been fairly active throughout the district, with a good attendance of buyers from the East and South. The receipts have been large, comprising, as they do, all that was detained by the recent break at St. Johnsville. The figures given below show continued large receipts at Buffalo and Oswego. Prices are very firm for all descriptions of Lumber, with an upward tendency of course especially, which is in very light stock; the indications are that the supply of course will continue light for the balance of the season, and much below the wants of the trade. With the exception of course, stocks are in good assortment.

The receipts at Chicago for the week ending Sept. 18 were 20,876,000 feet, against 20,200,000 feet for the corresponding week last year. The shipments for the week, 14,100,000 feet against 15,764,000 feet for the corresponding week in 1868. The aggregate receipts since Jan. 1 are 712,887,000 feet, against 739,974,000 feet in 1868. The aggregate shipments since Jan. 1 are 447,470,000 feet, against 495,621,000 feet in 1868.

The following figures give the reported receipts at Buffalo and Oswego for the week ending September 20, 1869 and 1868:

	1869.	1868.
Buffalo	6,902,000 feet.	6,968,000 feet.
Oswego	13,540,900 feet.	7,399,500 feet.
Total	20,442,900 feet.	14,367,700 feet.

The receipts at Buffalo and Oswego continue to increase; for the last four weeks the receipts for 1869 are about 72,100,000 feet, against 55,100,000 feet in 1868.

As the third canal week for September has not closed, we are without our usual weekly statement of the receipts of lumber at Albany. They have been large; and we will be found, we think, to have reached some 26,000,000 or 27,000,000 feet by both canals against 12,761,800 feet for the corresponding week in 1868. These figures would make the aggregate for the year 1869, so far, [illegible] feet against [illegible] feet in 1868. Deducting from the receipts of 1869 the 11,000,000 feet detained on the canal during the Winter of 1868-9, and the receipts for 1869 are about 16,000,000 feet ahead of those of 1868. The receipts during the balance of this month will be in excess of those for the same period in 1868.

We quote freights unchanged, with a good business."

BANKING AND FINANCIAL.

GEORGE OPDYKE & CO.,
BANKERS,
No. 25 Nassau-st.,
offer for sale the following desirable securities:

NEW-YORK AND OSWEGO MIDLAND RAILROAD first mortgage 7 per cent. Bonds, free of Government tax. Principal and interest payable in gold. Price, par and accrued interest in currency.

MOBILE AND MONTGOMERY RAILROAD first mortgage 8 per cent. Bonds. Price, 85 and accrued interest.

MISSOURI VALLEY RAILROAD first mortgage 7 per cent. GOLD BONDS. Price, 90; and accrued interest in currency.

BONDS OF THE COUNTY OF LEAVENWORTH, Kansas, 10 per cent. free of tax, strongly guaranteed. Price, par and accrued interest.

ALSO, 7 per cent. Bonds of the CITY OF OSWEGO.

The attention of investors is invited to these well-secured Bonds, and upon application full information will be furnished.

EIGHT PER CENT. CURRENCY BONDS, OF THE ALABAMA AND CHATTANOOGA RAILROAD COMPANY, FREE OF GOVERNMENT TAX. INDORSED BY THE STATE OF GEORGIA. Entire issue only $194,000. For sale at 90½ and interest, by SOUTTER & CO., No. 53 William-st, HENRY CLEWS & CO., No. 32 Wall-st.

THE SEVEN PER CENT. GOLD BONDS of the Danville, Urbana, Bloomington and Pekin Railroad Company are selling rapidly. The semi-annual interest will be paid Oct. 1, in gold coin, which makes a saving of one per cent. to those who purchase during the present month. See advertisement on the eighth page.
TURNER BROTHERS, Bankers,
No. 14 Nassau-st.

SEVEN PER CENT. GOLD PRINCIPAL AND INTEREST FIRST MORTGAGE CONVERTIBLE SINKING FUND BONDS, WITH FREE OF GOVERNMENT TAX, of the BURLINGTON, CEDAR RAPIDS AND MINNESOTA RAILROAD COMPANY. We confidently recommend these Bonds as a first-class investment. At the price they yield about 10 per cent. interest per annum. Only a limited amount are offered before advancing the price. Pamphlets and full particulars can be had on application. HENRY CLEWS & CO., No. 32 Wall-st., Financial Agents of the Company.

FIRST MORTGAGE LAND GRANT BONDS of Lake Superior and Mississippi Railroad Company. Ten cent. gold interest, free of United States tax. We recommend these bonds as a safe and profitable investment, producing nearly 10 per cent. per annum in currency, and for 7 to 20 years, with a prospect in increase of 25 per cent. in net annual income. Present price is and interest. Full particulars furnished by JAY COOKE & CO.

TIMES Office, New-York.

Notice.

We cannot notice anonymous communications. In all cases we require the writer's name and address, not for publication, but as a guarantee of good faith.

We cannot return rejected communications, nor preserve manuscripts, unless specially requested so to do.

To Advertisers.

Advertisers in the TIMES are requested to bring in their notices at as early an hour in the day as possible. If received after 8½ o'clock, it will be impossible to classify them under their proper heads.

NEWS OF THE DAY.

EUROPE.

The French Minister of Foreign Affairs and Mr. BURLINGAME have completed arrangements for establishing improved relations between France and China on a basis of mutual conciliation. The French representatives in China have been instructed to follow the new policy.

The London *Times* of yesterday, on the situation in France, says that the inactivity of the Emperor, if he has recovered, cannot be accounted for. The new Constitution is in operation, and public opinion demands that the Legislative Body should be called together. The delay causes uneasiness, and some members think of a convocation without the consent of the Executive. A technical quibble only, it is said, gives the Emperor six months between the dissolution and a reconvocation.

Lord WESBURY has been appointed Lord Justice of the Court of Appeals in Chancery, in the place of Sir C. J. SELWYN.

In an article on the depressed state of trade in Lancashire, the London *Times* thinks that the difficulty arises not entirely from the dearness and scarcity of cotton, but because there is not as great a demand as formerly for English manufactures, and consequently a loss of trade.

The religious papers of Paris express grief at the letter of Father HYACINTHE. The *Monde* says the fears long entertained of him are now confirmed; and the *Patrie* that his sermons, from their boldness, have drawn on him the condemnation of Papacy and of his superiors.

CUBA.

An ex-officer of JOURDAN'S Cuban army, who, as is reported, left that command Aug. 18, and the Cuban lines Aug. 26, has arrived in New-Orleans. He makes some interesting statements in regard to the recent operations on the island, and the situation of the forces. Among other items he gives the names of the insurgent District Commanders and of those of JOURDAN'S officers who have been killed. CESPEDES' Government is said to be located at Deseada, a village in the centre of the Puerto Principe District.

GENERAL.

An Omaha dispatch states that on the Pawnee Indian reservation near Columbus several Pawnees have been killed by the Sioux, causing great excitement among the former tribe. Fort Buford reports say that the Indians continue hostile. Outrages have also been committed in Montana, and at Helena and near the Blackfoot Agency one man had been killed in each locality.

Captain LEONARD, a notorious counterfeiter, was arrested in Philadelphia yesterday, by Treasury Agent JOHN A. CLARRAC; $6,000 in well-executed notes and currency were found upon his person. A large amount of counterfeit money was also discovered upon searching his house.

One of the thieves who has been infesting the Sound steamers on the Fall River line has been arrested at Newport, R. I. Stolen property was found in his possession, and more recovered at his room in a hotel. He gave his name as H. W. BEERS, of Quebec.

The newly-appointed Governor of the Northwest Territory, Hon. WM. MCDOUGALL, will leave Ottawa, Canada, for his seat of government, in about two weeks. The Hudson Bay Company are ready to deliver the deeds of transfer of the Territory before the loan is raised.

The colored people of Dayton, Ohio, and the surrounding country, celebrated on Wednesday the anniversary of the emancipation proclamation.

The Custom receipts for the week, ending yesterday, were $4,270,272.

In a difficulty in Columbia County, Georgia, on Sunday last, between a planter and a party of negroes, one of the negroes was killed. The planter, it is said, acted in self-defence.

The National Music Convention in Boston closed yesterday evening with an address from Bishop CLARKE, of Rhode Island, and a concert which was well attended.

The trial of JAMES GRIFFIN, the engineer of the freight train that caused the Mast Hope disaster on the Erie Railroad, was commenced at Milford, Penn., yesterday.

At Hudson, N. Y., Wednesday evening, at 7 o'clock, a young man named HURT was attacked by two men in the street, and a case containing sixty watches and other jewelry taken from him. He was knocked senseless with an iron bar. A reward of $100 has been offered by the Mayor of the city, for the arrest of the highwaymen.

A telegram from Jackson, Miss., states that an organized conspiracy has been discovered to release from prison Colonel YERGER, who several months ago assassinated Colonel CRAIG, the Mayor of the city. The plot was frustrated by the vigilance of the Commandant of the post, and a sergeant, two corporals and seven privates in the United States Army have been arrested, charged with complicity in the attempt.

The telegraph line to Lewes, Delaware, has been opened.

JOHN BRENNEMAN, 23 years old, of Grundy County, Ill., was arrested last week for the murder of his father, who disappeared about four months since. He confessed the crime and disclosed the place where the body was concealed. He implicates his father-in-law in the crime, and he has been arrested, but denies his guilt. The murderer attempted suicide in his cell Monday, but was unsuccessful. The crime was committed for the possession of $60.

Mr. W. D. MILLER, of Springfield, Mass., committed suicide, yesterday, by jumping into the Connecticut River at that city.

The engine of the California Pioneer excursion train ran off the track near Canton, Ohio, yesterday morning. Fortunately no one was injured.

At the meeting of the Grand Lodge of Good Templars of this State, now in session at Rochester, the Grand Officers were elected Wednesday evening, and Rev. SILAS BULL chosen Grand Worthy Chief.

The Portland, Me., Dry Dock, at Cape Elizabeth, was opened Wednesday. It is the largest in the country, excepting the one at Brooklyn, L. I.

Dispatches received at Ottawa, Ontario, say that Lord GRANVILLE, Colonial Secretary, strongly urges upon Governor MUSGRAVE and the Council of British Columbia the propriety and advantage of a union of that Province with the Confederation of Canada.

The names of the parties in the late California duel are given as JAMES SHERRERDS, an officer of the San Francisco Gas Company, and J. B. GARDNER, son of Ex-Governor GARDNER, of Massachusetts.

The National Universalist Convention at Buffalo closed its session yesterday. The next meeting will be held at Gloucester, Mass., in September, 1870, in which place the first Universalist Church in America was established. Rev. A. A. MINER, D. D., of Boston, was selected to preach the occasional sermon.

JOHN G. MIX, a well-known business man of Hartford, Conn., 67 years old, was instantly killed, yesterday, by a stick of timber, which fell upon him as he was superintending some repairs at his residence.

Prince ARTHUR, yesterday morning, visited Petrolia, the oil regions of Canada. In the afternoon with Sir JOHN YOUNG he formally opened Helmuth College, and in the evening attended a grand ball given by the citizens of London.

A fire at Vernon, Conn., on Tuesday, destroyed one of TARBOXY & BROUSSARD'S Stockinet Mills. Loss $67,000. Insurance $17,000.

On Friday last a daughter of Mr. WILLIAM WALKER, of Orange County, Va., in attempting to take a pistol from the hands of her father, who was about to commit suicide in a temporary fit of insanity, was shot and mortally wounded.

LOCAL.

Mr. CHAS. M. SIMONSON, Assistant Treasurer of the Harlem Railroad Company, was assaulted on Twenty-sixth-street, at 7 A. M. yesterday by three men. He was knocked down and robbed of a bag containing $9,000, with which the thieves jumped into a cart that was waiting for them and made good their escape.

JOHN ROONEY, charged with having run off with several barrels of seized whisky intrusted to his custody as a revenue officer, was discharged by United States Commissioner SHIELDS yesterday, the evidence failing to implicate him in the alleged fraud.

The Synod of the United Presbyterian Church assembled last evening in the Seventh-avenue Presbyterian Church, in this City, and after a sermon by Rev. J. J. BARR, organized and adjourned until 9 o'clock this morning.

The trial of WALLACE MCDANIELS for the murder of THOS. E. CORWIN, was commenced in the Court of Oyer and Terminer, at White Plains, yesterday.

The Executive Committee of the National Irish Immigration Society have issued a call for a National Convention to be held at St. Louis, Mo., on the 5th of October.

Neither Board of the Common Council met yesterday, the members not having returned from Syracuse.

JOHN FOGARTY, who was beaten with a shovel by TIMOTHY MOHIGH in Brooklyn on Wednesday, died yesterday. MOHIGH has been arrested.

The base-ball match yesterday between the Atlantics, of Brooklyn, and the Nationals, of Washington, resulted in favor of the former by a score of 21 to 10.

A Spanish Fleet in New-York.

We announced a few days since that some thirty gunboats were building in this port for the Spanish Government, to be used, as we apprehended, against the insurgent Cubans. In another column, our reporters' who have visited them all, furnish a detailed account of these vessels, the work for which they appear to be designed, and their present stages of preparation. From their reports it appears that these vessels are only of about 175 tons capacity; that they are to carry a single 100-pounder, and their quota of men and officers will not exceed twenty-five men. They are obviously intended for coasting warfare; to scour the rivers and bays navigable only by vessels of light draft, and to cooperate with land forces.

These vessels are now under the surveillance of an American man-of-war, upon the complaint of the Peruvian Government that they are designed to go to Cuba to replace and set at liberty the larger Spanish vessels now stationed on that coast, for warlike operations against Peru.

What evidence of this purpose may be in possession of our Government or of the Peruvian Minister we are not advised, but we infer that whatever there may be, is not in a shape to be used, as no libel has yet been filed by the District-Attorney against any of these vessels, though they have been lying under the guns of the Federal navy for several weeks.

No one who reads our reporters' description will have any doubt of the purpose for which these boats are constructed, or if allowed to leave this port, that Cuba is to be the theatre of their first activities. One of the number could be equipped and sent to sea in thirty-six hours; fifteen more in from four to six weeks, and the rest in three months. It is apparently the intention of the owners to send the fifteen most advanced, to sea first. Within six weeks therefore, the Federal Government must decide either to release them, with the certainty that they will be used for the immediate and ruthless destruction of the white population of Cuba which almost to a man, is compromised with the Government at Madrid or it must find some other pretext that it has now, for detaining them. We do not believe there is any evidence upon which a valid libel could be filed against one of these boats. They are built by a friendly Power to be used as a part of her coast guard, and in the present state of our relations with Spain we have no more authority to detain them than she would have to detain an American frigate which might casually touch for coal and water at Cadiz or Ferrol.

The question then recurs, Shall our Government turn a deaf ear to all the appeals of the revolted Cubans that we would observe a strict neutrality between them and their oppressors; shall we allow these vessels, built and manned in our harbor, to be used to crush a people whose only crime, like that of our own revolutionary forefathers, consists in refusing to be taxed without representation? This is a question which must be decided by the Cabinet at Washington within the next thirty days. To strip it of some of its difficulties, the President availed himself of an invitation to proffer his mediation between the Spanish Government and her colonists. The Madrid Government, however, was too weak to contend with the public sentiment aroused by its adversaries against the very proposals which, if made, it had promised to entertain, and now, it would appear by the latest advices, our mediatory offices have been deliberately withdrawn, and we are left to determine what part, as a Government, we are to take in a struggle which threatens to take serious proportions.

To concede belligerent rights to Cuba in the present temper of the Spanish mind would be equivalent to acknowledging her independence, and that would mean war. Neither France nor England would be unwilling to see our reviving commerce cut down to the root again by privateers. Spain has very little to lose, and much to gain, by a war with us. We should be the principal if not the only certain losers.

The contingency of a war, therefore, must now be deliberately looked in the face. Is the Cuban cause our cause? Will our national honor or any cherished policy be compromised by the suppression of this rebellion? Are we in any way responsible for the inhumanity of which Cuba is now the theatre, or are we under any neighborly obligation to employ force to stop it—to stop a brawl by making a war—to extinguish a fire by a deluge? Are we called upon to add several hundred millions to our debt—to pile up the burdens of taxation, already grievous to be borne, upon thirty millions of Americans, and tread the brinks of national bankruptcy for the next twenty years, in order to ameliorate the condition of three or four hundred thousand subjects of a foreign State? And on the other hand, are we to stand by, consenting like St. Paul to the stoning of Stephen, and see a people murderously crushed in its noble efforts to follow an example which the noblest of our ancestors set them scarcely a hundred years ago?

We have hoped that Spain would spare our Government and people the necessity of answering these questions. It would be wiser for her never to force them to a decision. A few weeks remain within which we are at liberty to hope, even though we do not expect Spain to relieve us from the painful alternative to which we are reduced. It is as well, therefore, for Americans to wait for any solution of these questions which time may possibly have in store, and not complicate the situation by prematurely proclaiming a policy for which, under the providence of God, no necessity may arise.

The New Constitution.

We are happy to observe that the Democratic Convention yesterday declared itself unconditionally against the adoption of the new Constitution. If anything would justify rebellion, it would be doubling the terms of Judges such as we find ourselves liable to be cursed with under the present system of selection. The new Constitution continues the elective system, and prolongs the Judical term of office to fourteen years. By the present Constitution they are elected for only seven. This feature of the new Constitution is therefore just twice as bad as the old.

If we accept this Constitution it will be many years before we can hope for another. If we reject it, we will probably have a Constitutional Convention as soon as the questions of suffrage and reconstruction are further advanced, or out of the way—an epoch certainly not many years, we think not many months, distant.

We will then try to get a Convention together that can comprehend the difference between a representative and an administrative or a judicial officer, and which will not perpetuate the folly of committing the choice of experts, like judges or physicians, to a town meeting.

By that time the public will have had opportunities of studying the morbid anatomy of the elective system under such peculiar advantages that we may expect the most perfect harmony among the delegates in their arrangements for its funeral.

General BUTLER's speech to the Agricultural Association in Worcester, Mass., yesterday, totally lacks the point and spirit he generally manages to infuse into his public addresses, and is very tame and cautious. Addresses to agricultural societies are apt, it is true, to be non-committal; but General BUTLER, after announcing "for our theme the aids given by legislation to agriculture, and the relation which the labor of the artisan bears to that in the field," does not succeed, apparently, in pointing out any particular "relation" or mentioning any "aids" either existing or desirable.

He declares, however, in a perfectly commonplace way, that "there is not yet a fair division of the profits of mechanical and manufacturing labor between the capitalists and the workmen;" that the two remedies for this evil are "giving a higher price for labor" and "shortening the hours for work;" and that neither of these things concern farm laborers, because in agriculture there is little capital employed, "no great profits to divide," and the hands are "found" in board and lodging and paid something besides.

He complains loudly that Massachusetts passed "but three acts touching agriculture" last year—which seems to us to illustrate the very good sense of Massachusetts legislation; and a dozen paragraphs further on the General himself says that "agriculture asks for no special legislation." This cue enables him to slash a little at special legislation of all kinds, especially for corporations—even here, however, he has none of his customary vigor of denunciation.

This is about all there is in a very long speech. One would suspect on reading it that his Stowe-Byron essay, which we published the other day, had drawn the General's fire.

The Two Policies Before the Country; Which is Entitled to Public Support?

The Democratic Convention of this State, and the Republican Convention in Massachusetts, have assisted in shadowing forth the policy which the two great parties are prepared to submit to the country. The Republicans of New-York may, perhaps, differ with their Massachusetts brethren on minor points, but upon all broad or essential measures they will be found agreed.

The Democrats of the State bring against the President a series of accusations which have the disadvantage of being opposed to the facts of contemporary history. They charge the Administration with having prolonged the disunion of the States for partisan purposes, with supporting class interests and failing to protect the masses, with "turning its back upon the people," and becoming "the pensioner and patron of accumulated wealth"—a bill of indictment which obviously partakes rather of the character of distempered invective than of a sober relation capable of being supported by facts. When, for example, the Democratic Party alleges that the Government has "by military dictation and arbitrary penalties" endeavored "to coerce communities and States into assent to its measures," the most careless observer of events must be aware that the record of the Government is completely falsified. Was the action of the Cabinet in reference to the Legislature of Virginia and General CANBY one of coercion? Did not the Attorney-General pronounce authoritatively against General CANBY's threatened rigor? So of President GRANT's express instructions with reference to Georgia and Louisiana. The readers of this journal need not be reminded that the Administration was clearly on the side of moderation, and has given no cause for the reproaches now cast upon it.

The criticisms on the foreign policy of the Government amount to nothing more than the old attempt to make political capital out of certain national prejudices. The reference to that touchstone of party policy, the payment of the national bonds, is not much nobler in its character. The Democratic Party avows itself in favor of discharging all obligations "in the manner provided for by the law." When we recollect the different interpretations which casuists have placed upon the interpretation of the law or laws thus referred to, we are forced to the conclusion that the Democrats have met a crucial point, on which a straightforward opinion was demanded, with a quibble. Again, they denounce the high taxation of the country, but their proposed remedies will only excite the derision of all educated political economists within their own ranks. The Convention further assails the Fifteenth Amendment in no measured terms.

The necessities of the people and the highest purposes of Government are alike lost sight of in this platform. It is a mere sending up of balloons to see which way the wind is blowing. A very different appreciation of the duties which now devolve upon thoughtful men is revealed in the resolutions adopted by the Massachusetts Republicans, and will be further shown in the approaching Convention of this State. Massachusetts meets the public questions of the hour with equal candor and confidence. It alleges that the Democratic Party has forfeited all claims to the confidence of the people by its endeavors to "perpetuate disunion in the rebel States," and by "its enunciation of the doctrine of practical repudiation." General GRANT's Administration is praised for the moderation and fairness of its foreign and domestic policy, and for its scrupulous regard for the public faith—the latter being a virtue which the Democrats insist upon regarding as a vice. Economy, the reduction of the national debt, (carefully ignored in the Democratic platform of this State,) and an able management of the public revenue, are also achievements of the National Government which the Massachusetts Republicans cordially approve. The principles thus indicated include the basis of their policy for the future, supplemented with a recognition of "all the rights and privileges which belong to labor," and a declaration of general fidelity to the doctrines which are identified with the Republican Party. In State affairs the Convention also took up strong ground, and wisely left the temperance question to be settled by the Legislature.

In a few days the Republicans of this State will make their appeal to the people. We have no doubt that it will be not less definite and outspoken than the Massachusetts programme. Economy, the preservation of our good name and fame at home and abroad, the reduction of the national debt, the lightening of taxes, the general advancement and prosperity of the country—this, in brief, is the Republican policy. The Democrats meet it with cavils at the reforms we have already accomplished, and timid hints of a policy which the people have disdained to adopt. Under such circumstances, the Republicans may well go forth to the fight with cheerful hearts.

A plan has been put forward in England, by several influential legal societies, for the amalgamation of the two branches of the law as now practiced by barristers and attorneys. Such a scheme will probably convince the Tory Party that England is "Americanizing her institutions" with startling rapidity, but the change has long been desired by the public at large. At present a barrister in England cannot take a case direct from a client—he must be instructed by an attorney. On the other hand, an attorney is not allowed to plead in any of the Superior Courts—he must employ a barrister as his mouthpiece. He may conduct a case before a Magistrate, but will not be allowed to appear before a Judge. The attorney may be a good, sound lawyer, and the barrister may not have an ounce of legal knowledge to boast of, but the attorney cannot be heard. He gets up a case, sees the witnesses, makes himself thoroughly acquainted with all the facts, and then is obliged to turn the cause over to another man, who will probably not give adequate attention to it, and who takes far less interest in it than the attorney. With us, as every one knows, the common-sense course is adopted of making no practical distinction between the two branches of the profession. In England if a barrister wishes to practice as an attorney, he must first submit to be disbarred, and then pass examinations exactly as if he were beginning a legal career over again. An attorney who aspires to be a barrister is first struck off the rolls, and has to keep terms and "eat dinners" for three years—precisely as if he had never been in the profession at all. These anomalies are now likely to be abolished. The legal profession are interested in the reform, while it would undoubtedly prove a great convenience to the public. The objections would probably come from the old school of practitioners, who dread the sharp and eager competition of young men.

The Excitement in Wall-Street.

The excitement in Wall-street on Wednesday, as already reported through our Money column of yesterday, was at fever heat through the forenoon on New-York Central and the other so-called Vanderbilt Railways. It was at white heat late in the day on Gold. The former fluctuated twenty-two per cent. in less than as many minutes on rumors of judicial interference with the consolidation authorized by the last Legislature of the New-York Central and Hudson River Roads. But the Central Directors were in session at Albany, and whatever process was sued out must have been against the Hudson River Directors. The two Boards are composed pretty much of the same set of gentlemen. The alleged complaint must have been against the Hudson Board, as it is now certain that no injunction was served at Albany. The Central Board got through with the business which called them together at Albany, and all parties were in this City yesterday. They met as a Hudson Board at noon, and as a Central Board an hour or two later. But this is foreign to the violent fluctuations of Wednesday. The price of Central opened at 198, fell to 176, and left off at 185 per cent. This was the end, for the day, of sensation number one, though we may remark, by the way, that it carried down the Western Railways in its erratic course.

The second sensation related to the speculation and practical corner in gold. And here about 3 o'clock on Wednesday afternoon appeared on the scene the inevitable and irrepressible FISK, Jr. His presence in the Gold Room was signalized by the rapid rise in gold from 137½ to 141¼ per cent., and by the offer of wagers for any part of $50,000 that the price would reach 145 per cent. The other engineers of the movement were not idle, nor had they been through the earlier part of the day. They not only *bulled* gold with a will, but talked freely of the warrant which they had from Washington that the Government would not interfere with them. The highest official in the land was quoted *as being with them*, and he, of course, controls the action of the Secretary of the Treasury and the New-York Assistant Treasurer. Although this must have been known to be false, there were abundant rumors and suspicions insidiously spread around the Street to create the belief or fear with good men that the Administration would *not* interpose by further sales of Gold from the Treasury, or extra purchases of United States 5-20s in exchange for Gold. Among those rumors was one that the Gould-Fisk party were about to secure the services and influence of Mr. CORBIN, (the brother-in-law of the President,) as President of the Tenth National Bank, which they have recently purchased, in connection with Messrs. TWEED and SWEENEY. The consideration was to be $25,000 per annum—equal to President GRANT's own salary! This was too monstrous for serious belief. We have reason to know it is wholly out of the chapter of probabilities with Mr. CORBIN himself.

Yesterday the Central and Hudson affair was comparatively quiet, but the gold sensation was renewed with greatly increased intensity. The Gould-Fisk brokers bid the price up to 144 per cent. The party, without demanding their gold, compelled the sellers and borrowers who had contracts with them to place five or seven per cent. additional advance in price in their own hands, or else settle at the price of the day.

This scene may be amusing enough to our readers, as a Wall-street fight between *Bull* and *Bear*, but it has a more serious aspect. The business of the Produce Exchange, and the conduct of the ordinary Foreign Exchanges of the market, are paralyzed by this heavy rise and *corner* in Gold, *through a sheer gambling operation*. The Government is scandalized by false rumors of complicity; the public credit damaged by the fall in the funds, and the general trade of the country agitated and unduly alarmed by a panic in money coincident with, if not directly superinduced by, the lock-up in gold. When or where the trouble is to end we have no present means of telling.

The Detroit *Free Press* rates the Postmaster-General in the most insulting terms for having promised to recommend Congress to allow Senator RAMSEY something beyond the pay of an ordinary Special Mail Agent, for his services in going abroad to negotiate a postal treaty with France.

We would respectfully ask the *Press* if it thinks the wages of a Mail Agent would be a suitable compensation for a person fit to be trusted with such a negotiation, and if Mr. CRESWELL, to secure the services for such a duty of a man who, by his position, possessed certain special advantages for it, was imprudent in promising to recommend Congress to allow such a person enough to cover his expenses? We also would like to know if Senator RAMSEY, who undertook the mission with only a Mail Agent's pay, (it CHARLES HAYES, and he may not find it pleasant to suffer should think that the value of his services deserves to be rated and reviled in the language of a fish-woman?

Really, it strikes us that the *Press* abuses the freedom of speech and the Press in making so light of the character and motives of public men.

The Troy *Press* says:

"Two more distinguished names may now, we presume, be added to the list of our great men whose aspirations for the Presidency have been defeated, and who, we regret to believe, are probably stricken from the roll of possible occupants of the White House."

The names given are CHASE and SEYMOUR. Neither of these gentlemen, nor their friends, will thank the *Press* for this announcement.

PERSONAL AND LITERARY.

We regret to announce the death of a well-known publisher, Mr. JAMES SADLIER, which took place at Far Rockaway, on Tuesday. The deceased was of the firm of D. & J. SADLIER & Co., the Catholic publishing house, and was about fifty years of age.

General SHERIDAN, Senator THURMAN and two daughters, and D. MCKINNEY, of the Central Pacific Railroad, who is on his way to Vera Cruz, Mexico, were in St. Louis, Mo., yesterday.

Messrs. BATEMAN and REVY, two civil engineers, are anxious to carry a railway, through a cast-iron tube, from England to France by way of the Straits of Dover, and have just published a work describing and advocating such an undertaking.

Sir RODERICK MURCHISON still believes in the safety of Dr. LIVINGSTONE. In his last communication on the subject Sir RODERICK states that he has such implicit confidence in the tenacity of purpose, undying resolution and heroic frame of Dr. LIVINGSTONE, that he holds stoutly to the opinion that he will overcome every obstacle, and will emerge from South Africa on the same western shore on which he appeared after his first great march across that region, and long after his life had been despaired of.

The latest and most fantastic suggestion in the way of telegraphy is that of a French enthusiast, who, like all inventors and originators of grand ideas, is now being heartily laughed at in Europe for his pains. The old plan with dreamers was to rack or burn them; the new plan is to cover them with ridicule. Perhaps in this case such punishment is not ill-deserved. Our enthusiast's proposal is, not to fly to the moon, but to communicate with the planets. He wishes to mount a gigantic mirror, capable of being readily moved, and to give flashing signals to Jupiter or Venus. His theory is, that if these are repeated regularly at given intervals and in equal numbers of times, the inhabitants of the planets will come to discern them, to understand that they mean something and to return them. Should they do this, a code of signals could manifestly, without much difficulty, be devised. The proposer of this curious scheme points out that even now bright spots are occasionally seen on some of the planets, and suggests that they may possibly be similar signals from the inhabitants of those orbs to each other and to us. The idea is said to have been discussed before now, and to have been abandoned; but, however impracticable or absurd, it has been thought worthy of serious attention by the French Academy of Sciences.

Among the new books just published or about to be published in London are the third volume of Mr. FREEMAN'S *History of the Norman Conquest*; a book of travels in Central Africa, by Mr. and Mrs. PETHERICK; a new edition of *Theocritus*, by Mr. HERBERT SNOW, of Eton College; the last volume of Mr. FROUDE'S *History of England*; Sir H. L. BULWER'S *Memoirs of Lord Palmerston*, with extracts from his Lordship's lately-discovered diary; Sir ALEXANDER COCKBURN'S important treatise on *Nationality; Or, the Law Relating to Subjects and Aliens, with a View to Future Legislation*; a Memoir of Miss MITFORD, by Rev. G. L'ESTRANGE, and one of JANE AUSTEN, by her nephew, Rev. J. AUSTEN LEIGH; a new and complete edition of SHELLEY, edited by ROSSETTI; a *Universal Index of Biography*, a companion to HAYDN'S *Dictionary of Dates*; and two important maps, by command of the Government, namely, (1) Ordnance Survey Map of England and Wales, and (2) Geological Survey of England and Wales. The first has been prepared under the superintendence of Sir HENRY JAMES, and the second under that of Sir RODERICK MURCHISON.

Judge M. M. Cohen, of New-Orleans; General T. L. Clingman, of North Carolina; Colonel J. F. Cassily, of Texas; Hon. J. Edgar Thompson, of Philadelphia; and Hon. T. S. Faxton, of Utica, are at the St. Nicholas Hotel. The Marquis De Caniny, of France, is at the New-York Hotel. Mr. E. Valles, of the Spanish Legation, is at the Albemarle Hotel. Governor Reed, of Florida, is at the Astor House. Judge Martin Grover, of Washington; Judge Daniels, of New-York; Hon. Giles A. Smith, of Washington; Judge W. Hunt, of New-York; and Judge Mason, of Hamilton, are at the Metropolitan Hotel.

The Paris correspondent of the London *Telegraph* writes: "While the Parisian world is fast going abroad, foreigners are still flocking here, some 'for good.' Among the latter is Mr. CRIMMICH, an American archi-millionaire, who is expected to renew the bygone splendors of another Yankee, Mr. THORN, who, in 1840, astonished Paris with his magnificence and originality. Every person of note was to be met with at his house. Among other odd notions, he made it a rule that nobody should be admitted after 10 P. M., and all seemed glad to submit to the restriction. This caused Mme. EMIL DE GIRARDIN, then in the glory of her *Chroniques*, to say: 'Were Mr. THORN to put on his invitation cards *en bonnet de coton*, every one would be glad to appear in that useful, if not ornamental, head-dress.'"

The Proposed Removal of Disabilities in West Virginia—President Grant's Views.

From the Wheeling (W. Va.) Intelligencer, Sept. 22.

In a brief conversation yesterday between two or three of our citizens and President GRANT, the address recently issued by the Republicans of this county was referred to, and some explanations were made to His Excellency respecting the character of those by whom it was put forth, and the purpose of the general movement of which it was an exponent and part. The President said that he had read the address referred to, and so far as he understood our local affairs, he thought the policy advocated in it was "right and proper." He thought discriminations on account of participation in the rebellion should now cease, and referred to the fact that, acting upon this idea, he had "afforded the people of Virginia and Mississippi an opportunity to throw overboard the obnoxious clauses of their Constitutions" enforcing such discriminations. He said care should be taken to avoid division among the Republicans such as happened in Tennessee; but he thought the ideas advocated in the Wheeling address were "about right." Being asked if he had any objection to having his approval of these ideas made known, he replied that it would be improper for him to interfere in any way in our local politics; and he did not want to be mixed up with them. But this expression of his views having been thus drawn from him without the slightest thought on his part of interfering or volunteering advice, we feel that there can be no impropriety in stating the main point of the conversation as we have done, viz.: That President GRANT's attention had already been attracted to the Liberal Republican movement in this State, and that he regards it with decided favor, as being in consonance with his own ideas and official acts; and that while he counsels the utmost caution to avoid a division among us, he would gladly see the Republicans of the State united on such a platform as that embodied in the Wheeling Address.

A Slander Refuted by General Rosecrans.

The following letter from General ROSECRANS appears in the Columbus (Ohio) State *Journal*:

SAN RAFAEL, Cal., Sept. 11, 1869.

MY DEAR GENERAL: Your favor of the 8th ult. is before me. Having been mislaid, it has remained unanswered till now. The foolish story you desire me to contradict, about my having once seized General HAYES by the collar and threatened to cut off his shoulder-straps, does injustice to me, it is true; but I am so used to misrepresentation and calumny through the Press, that I seldom notice even the greatest. However, as it also does shameful injustice to Governor HAYES, and he may not find it pleasant to suffer as I do, nor easy to prove a negative, it is my pleasure to say that no such occurrence transpired, nor have I ever had occasion, so far as I now remember, for aught but commendation of the military conduct of Governor HAYES while under my command. On the contrary, he had both my respect and esteem as an officer and a gentleman, and still retains them.

Truly yours, W. S. ROSECRANS
To General J. M. COMLY, Columbus, Ohio.

THE FESTIVAL OF FASHION.

Winter Opening Day—Growth of Opening Days—The "Small Industries"—Capital—An Endless Opening Day at Stewart's—The Novelties of the Season—Sacques, Bonnets and Ball Dresses and Boots.

Yesterday was one of what we may call the "Ladies' Days," or "Festivals of Fashion," of which but two or three occur in the course of the year, and which excite the souls of myriads of ladies, who take little interest in any of the more serious or imposing festivals indicated by the almanac. The weather was all that could be desired, the day being of that peculiarly semi-subdued yet luminous quality so characteristic of the golden September. It came like a bow of promise, after the dullness and rains of the previous day, and troops of ladies, like foxhounds let loose from leash, followed their fine scent, which often led them from the broad avenues to quiet cross streets and exclusively-retired "Places," where drawn lace blinds concealed from the rude gaze of passers-by the wealth of beauty and of taste within.

We often hear it said that opening days are going out of fashion. But the style only is changed, owing to a change of circumstances. When New-York was a few years younger than it is now, and the "attractions" were massed together on Broadway, a lady could easily do them all in a day. But the increase of the wealthy classes, the extension of the City, the investment of capital in articles of luxury, the gentrification of trade into streets which had before been devoted to private residences, necessarily caused fashion openings to assume new forms of expression. A new element, too, has been introduced, which almost definitely determines the form in which fashion openings will ultimately assert themselves. We refer to a well-known feature of trade in France, called "the small industries." These are specialities requiring little capital, much taste, a vital interest in details, constant attention, tact, courtesy, &c.

The "small industry" interest is flourishing here as upon its native soil. It sinks the shop in the studio, the mart in the sanctuary. The priestesses who preside here are the standard bearers of individuality—the teachers and criterions of what may be called technical taste. They are attended by dainty-handed vestals, each working out in her own particular line the fit result of delicate imaginings. All are surrounded by the quiet sanctity of home, for signs or show cases there are none. Cards or notes—always in the latest style—are sent to the parties whose presence is desired.

We always grow enthusiastic in contemplating these elegant "small industries" which rob trade of its heartlessness and allow woman to be as nature intended her, a priestess, instead of reducing her to a shop girl. We clap our hands and cry 'Vivas' for the "small industries" and the expansion of individuality. On this occasion we had even become revolutionary, and cried "Down with capital." Then the Spirit of the Multitude took possession of us and we drifted to the corner of Tenth-street and Broadway. "Come up hither," saith the Spirit, "and I will show you all the glories of capital and the beneficences thereof." And we went into STEWART'S magnificent marble palace, and behold, and were convinced, and our heart shouted "Vivas for Capital," which sends its ships on all the waters of the world; which brings shawls from India, silks from Persia and wraps from sun-blest Araby; which puts in play the magic shuttles of Antwerp and of Lyons looms, and dyes in prisms hues the silken fleeces that whiten Southern hillslopes; which sets in motion the skillful fingers in lace-workers, shaded rooms, and thence produces the intricate lace-robes worth ten thousand times their weight in gold. Vivas for Capital, on whose command attend whole armies of sailors, shopmen, sewers, writers, artists, weavers, builders; Vivas for Capital, whose grand cosmopolitan temples stand on the highways of the world. Vivas for Capital, the portals of whose palaces stand equally open for the heiress with her money and the widow with her mite.

A CONTINUOUS OPENING DAY.

At STEWART'S we were told that they had no regular opening—that every day was an opening day there—that goods arrived every day and were opened and displayed with dispatch. Ladies may always come here with the assurance of seeing the latest novelties—of seeing them within a few hours of their arrival—one day hats and bonnets, another day cloaks for opera or sacques for street wear; now pattern bridal dresses, now infants' wardrobes. We saw here some exquisite specimens of Berlin wool work overcast with silk—a novelty in the market. On Tuesday a still larger assortment will be displayed. These will be imported direct from Berlin, where they are produced according to order for this house.

BASQUINES.

It is yet too early to speak definitely of Winter outdoor garments proper, but they will for the most part be in panier style

sensible change indeed, and one which the fair who [illegible] duly appreciate.

BALL DRESSES.

At McCREERY'S, on Eleventh-street and Broadway, another of the imposing piles reared by King Capital to supply ladies with unlimited luxuries, we saw a magnificent robe in A. showcase—two of them in fact—a dinner and a ball dress; the dinner dress was of black poult de soie trimmed with green satin, the satin was worked in round rolls around the train and up the sides, other rolls crossed the front in sweeping crescent shapes; the waists were sashed, the silk and trimming required being furnished with the skirt. The other was also without waist; the skirt was fit for an Empress. It was of lavender-colored silk with flounces around the bottom, said flounces being cut shallow teeth at some distance from each other; the whole was finished with folds of lavender and white satin; the fulness was formed by plaits between each tooth. These plaits were held down in the middle by bias folds of lavender and white satin, which formed a heading to a narrow fall of points applique. The overskirt was short, and consisted of three pointed tabs forming front and side, and two puffs behind the sides and back were held together by puffings of satin, in imitation of slashings; the whole was finished with point applique and satin, the same as the flounce; a short sash and bow ornamented the back. We were shown here some black silk quilted petticoats, such as were worn in the days of Lady JANE GREY. They promise to be popular this Winter, replacing, as designed, the old Balmoral.

SEWING-MACHINES CRAFT.

We saw at the Metropolitan Furnishing Rooms, No. 486 Broadway, where the Grover & Baker family sewing machines are exclusively used, several triumphs of the loom to which a new value was added by the triumph of the needle. The most interesting things exhibited were infants' wear, many articles of which were so fine that they could be drawn through a finger ring. The embroidery effected on this machine, when done in high-colored silks, has a richness peculiarly Oriental, while for making clothes that even range of boys cannot burst, it stands unrivaled.

HATS AND BONNETS.

Mme. FERRERO, No. 6 Lafayette-place, held an extremely elegant opening. The echoes of the Astor Library resounded for hours yesterday with the roll of carriages passing its portals on their way to that lady's residence at the lower end of the place. If the shades of heroes, saints and philosophers hover about the places where their records or their works repose in honored state, how they must have wondered at the rush and roll of equipages in this usually so quiet street. If they could have known the occasion, would they have conceded souls to women? Doubtless not, they are apt to be sardonic, those old world-teachers. But not even the pupils of SOCRATES had such souls as these. Not even the lilies of the fields were arrayed as they were.

It is not enough to say of Mme. FERRERO that all her pattern hats and bonnets come from such well-known Paris houses as Le Chevelier's, Maguier's, Valerie Granx, De La Forrest's and others, for she chooses all her pattern articles herself, giving to the work her time, taste and personal interest. The specimens thus imported give a very different impression of Parisian taste than those usually forwarded by commissionaires, whose only interest is expressed by "per cent." Then, again, in adapting these bonnets to the varied styles of a very exclusive class of ladies, many new and exquisite results are obtained. In bonnets we have indeed a novelty to chronicle—the new bonnet is the very reverse of the old—the diadem instead of being across the brow is across the chignon. The whole bonnet instead of being flat on the head, a la Fanchon, towers over it,—in height they seem to desire to equal gentlemen's stove-pipe hats. They, too, are clamoring for equality with masculine things. With this the effort ceases—only in a few cases is severity affected. Yet, even in these the severity is relieved with grace. The model of this style is the Valois, a bell-crowned hat of black silk beaver of exquisite pile; it is bound around the rim and trimmed around the crown with narrow bias black velvet folds; these hold a large, graceful and sweeping black ostrich feather; for more dress occasions this feather may be taken off, and a white one—the Plume of Navarre—be worn in its place. Hats are, for the most part, historic, such as D'Artagnan, La Ligue, Bernois and others. A few, however, are quite modern—one, a dainty little device, called the "Patry," in honor of Mme. PATRY, the celebrated and exquisite *artiste* of the Rue de la Victoire. This bijou is composed of a high velvet coronet of the new shade of red, called Venus. Three plumes of the same color, but shaded, spring from this coronet backward, and form the top of the bonnet. Velvet strings borded with satin, all of the same shade as the coronet, takes the place of the beneiton loop. These strings are curiously knotted in a way that brings out the peculiar sheen of the satin at many angles. It is a marvel of elegant and attractive simplicity, and fittingly named the Patry.

THE LITERATURE OF FASHION.

Not the least among the attractive places on Broadway to fashion-seekers was ROY'S book-store, near Twelfth-street, where were displayed the leading Paris fashion journals, such as the *Moniteur de la Mode*, *La France Elegante*, *Le Follet*, *Le Monde Elégante* and others which have long been received as authority across the water. Nor were native productions ignored, each American fashion journal, whether GODEY'S, or LESLIE'S, or DEMOREST'S, or TAYLOR'S, or HARPER'S, having had deservedly its especial *clientèle*.

That fashion should have its literature, its homenclature and its symbols, as well as its ateliers and its palaces, is one of the signs of hope and promise of the times. The love of adornment, innate in every feminine soul, is not a thing to be laughed at, or sneered at, or repressed, but a thing to be fostered, educated, developed and wisely directed. It is the mission of the fashion journal not merely to set forth the whims of to-day or to-morrow, but to teach the laws of beauty, which are laws of color, of fitness, of proportion, of harmony, and which are unchangeable and eternal. It is their mission to fit woman for the beautiful sphere for which nature, apparently at least, intended her.

Man has his military journals, that he may learn how to break men's bones, and his journals of surgery, that he may learn how to mend them; has his journals of mining, and engineering, and metallurgy, and architecture, that he may excavate tunnels, build bridges, smelt ore and run railways. Woman has *her* journals, that she may learn to fix the blush on the rose, the perfume in the violet, the summer sunset on the glowing leaf, that she may learn how to *enhance herself* with every charm, the secret of which she seduces from wave or shell or feather, or bird or beast or caribou, or which she gleans from the written or pictured words of writers or artists who live nearer heaven than she does, and share more intimately the confidences of the gods. Who shall undertake to determine whether man's "little industries" or hers are the greater?

Senator Sumner's Speech—England's Conduct During the War.

To the Editor of the New-York Times:

The iteration by Mr. SUMNER of England's blame in recognizing a state of belligerency instead of rebellion in this country seems to me womanish. How could a free Government withdraw its protection from subjects trading with a great country merely because a riot or rebellion was going on there? The British people have not, and never had, any jealousy of or animosity to their kindred on this side of the Atlantic; their Government pressed the few that took part in defence of the colonies, and the present generation insist that British subjects must be governed in Canada and Australia by their own will, and not the will of Downing-street. Truth is stronger than fiction.

Yours, faithfully, INVERNESS.

NEW-YORK, Thursday, Sept. 23, 1869.

GENERAL TELEGRAMS.

FRANCE.

The Conduct of Napoleon With Regard to the Legislative Body—Improved Relations With China.

LONDON, Sept. 23.—The Times to-day has an editorial on the present situation of affairs in France. It says: "If the Emperor is now recovered his conduct cannot easily be accounted for. The new Constitution may be regarded as already virtually in vigor. The granting of amnesty, the tolerance extended to the Press, every circumstance contributes to foster the conviction that a new era has dawned. Yet the Emperor remains inactive, as if he considered everything done. Meanwhile public opinion demands the convocation of the Legislative Body. Uneasiness is the daily cause some members to contemplate the invasion of their own premises next month with the view of deliberating without the consent of the executive. No one, however, expects a resort to such extremes. The legality of the Emperor's conduct in allowing six months to elapse between the dissolution and reconvocation of the Chambers depends on a technical quibble. Although the Corps Legislatif separated before it was constituted, still it had given formal signs of its existence by several divisions."

PARIS, Sept. 23.—The Prince DE LA TOUR D'AUVERGNE, the French Minister of Foreign Affairs, and Mr. BURLINGAME, of the Chinese Embassy, have made arrangements for establishing improved relations between France and China on the basis of mutual conciliation, and the French Government has sent out instructions to its representatives in China to act in accordance with this policy.

Father Hyacinthe's Latest Opinions of the Religious Press.

PARIS, Sept. 23.—The religious journals express grief at the letter of Père HYACINTHE. *Le Monde* says the letter justifies the fears which have long been entertained in regard to him. No such language has been heard in the French Church since the Middle Age.

La Patrie declares that the independent language and courageous tone of his sermons attracted much attention, and have drawn on the preacher the condemnation of the Papacy and of his superiors.

THE COTTON TRADE.

What is Required to Start the Lancashire Mills—According to the London Times, not Cotton but Consumers.

LONDON, Sept. 23.—The Times, in an article on the cotton supply, says: "Mr. ASHFORD and Mr. BANNER, by different methods, arrive at the same end, namely, that nothing is wanted but cotton. More cotton would start the mills, dispel distress and silence the clamors against free trade. Of this we are not sure; but we are well aware that the prostration of industry in Lancashire demands attention. Cotton is dear because it is scarce. Why scarce? The crop of the Southern States, with considerable consignments from other points, has enormously increased the supply. If less cotton arrives, Liverpool must investigate the cause. It would be safer to say that Lancashire suffers from loss of trade more than from dearness and scarcity of cotton.

The demand for goods is less than it formerly was. If the Americans would take our manufactures as freely as we take their corn and cotton, the industry would be entirely cure and the supply of material theirs. It is not impossible that the protective tariffs of other countries are answerable in some degree for the depression in Lancashire. It is certain that in this case cheap cotton will not remedy the suffering. The loss of the market is not material. Our manufactures formerly commanded the world; they were better and cheaper than those of other countries. What is to be done now that people refuse to buy in the cheapest market. Without free trade manufacturing excellence loses its value. If trade is bad in consequence of the restrictions of other countries the scarcity or abundance of cotton is immaterial. Without doubt Lancashire suffers because other countries refuse to trade freely with us. To attempt to relieve her sufferings by refusing to trade freely with them would be absurd.

GREAT BRITAIN.

A Judicial Appointment—Shipment of Specie for New York.

LONDON, Sept. 23.—Lord WESTBURY has been appointed Lord Justice of the Court of Appeals in Chancery *vice* Sir C. J. SELWYN.

The steamship *Malta*, for New-York, took out $71,000 in specie.

CANADA.

British Columbia and the Confederation—Dispatches from the British Colonial Secretary—The North Territory.

OTTAWA, Ontario, Sept. 23.—Important dispatches have been received from Lord GRANVILLE in reference to the admission of British Columbia to the Confederation of Canada. He strongly urges upon Governor MUSGROVE and the Council the propriety and advantage of a union.

Hon. WILLIAM MCDOUGALL, the newly-appointed Governor of the Northwest Territory, will leave for his seat of Government in about two weeks. It is understood that there will be no difficulty about the delivery of the deeds of transfer of the Northwest Territory before the loan is raised. The solicitors of the Hudson's Bay Company are prepared to deliver them at once. Mr. MCDOUGALL has made an arrangement with an American company to run a telegraph line to Fort Garry.

Prince Arthur in London, Ontario.

LONDON, Ontario, Sept. 23.—Prince ARTHUR visited Petrolia to-day, and was shown through the large oil wells. He was much pleased at the sight, and returned at noon. In the afternoon the Prince, with Sir JOHN YOUNG, formally opened Helmuth College. In the evening he attended a ball given by the citizens, which was a splendid affair. The Governor-General and staff were also present.

Sinking of a Steamer in the Arkansas—Interfering with Revenue Officers.

MEMPHIS, Sept. 23.—The steamer *Guidon*, hence for Little Rock, struck a snag at Red Fork, Arkansas River, on Tuesday, and sunk in four feet of water. She had a valuable cargo on board, which will be lost. The boat will be raised again.

The revenue officers after seizing over 10,000 pounds of tobacco in the store of EDMUNDS, PETTIGREW & Co. released the remainder. This morning, before the hour of trial, on a criminal warrant issued by Justice HALL, Judge EMERY, the Supervisor, obtained warrants from United States Commissioner SMITH for the arrest of EDMUNDS, PETTIGREW and CARTER, and also Deputy Sheriff GARRETT and Justice HALL, for interfering with United States officers in the discharge of their duties. The three former were held to bail in $10,000 each, and the latter two were discharged, there being no evidence of their knowing the plaintiffs to be United States officers.

Arrest of a Counterfeiter in Philadelphia—Large Amounts in Spurious Funds Found.

PHILADELPHIA, Sept. 23.—United States Treasury Agent JOHN A. CLARVOE this morning arrested Captain LEONARD, a famous counterfeiter. Upon the prisoner were found between three and four thousand dollars in twenties, tens and fives upon national banks, and about $1,000 in twenty-five cent notes. The notes were well executed in the highest style of art. LEONARD was found in a house in the neighborhood of Seventh and Walnut streets, where he had been living for some time past with a woman. The house was searched this morning and the woman arrested. In the house the officers found a large quantity of counterfeit money done up in packages.

Good Templary—Officers of the Grand Lodge of the State.

ROCHESTER, N. Y., Sept. 23.—At the session, last evening, of the Grand Lodge of the Independent Order of Good-Templars, of the State of New-York, the following officers were elected: Rev. [illegible], Grand Worthy Chief Templar; Mrs. ANNA T. RASDALL, Grand Worthy Vice Templar; H. F. FERRIN, Grand Worthy Treasurer; W. G. MCKEE, Grand Worthy Secretary; J. A. VANER, Grand Worthy Counsellor. The session yesterday was devoted to Lodge business exclusively.

THE UNIVERSALISTS.

The Convention at Buffalo—The Third and Last Day's Proceedings.

BUFFALO, N. Y., Sept. 23.—This was the third day of the meeting of the National Universalists' Convention.

A woman's mass meeting was held at Dr. HANFELL'S Church, at 8:30 this morning, to organize a Universalist Association, and raise a Murray Centenary Fund. Three hundred names were appended to the list of membership.

The Convention was occupied during the forenoon in discussing the report of the Centenary Committee. The report was unanimously adopted.

Rev. ASA SAKE, D. D., of Rochester, was elected General Secretary of the Convention; Rev. Dr. BROOKS, of Philadelphia, was made Trustee in place of Rev. D. K. LEE, deceased; C. E. CROWELL, the Treasurer of the Convention, resigned, and D. L. HOLDEN, of New-Jersey, was elected in his place.

The next meeting of the Convention will be held at Gloucester, Mass., in September, 1870, where the first Universalist church was established in America. Rev. A. A. MINER, D. D., of Boston, will preach the occasional sermon.

The Convention adjourned *sine die*.

The National Musical Convention at Boston—Music in Worship.

BOSTON, Sept. 23.—In the National Musical Convention to-day, L. H. SOUTHARD, of Baltimore, delivered an address on music as an element of worship. He protested against the adoption of vulgar or popular music in churches. He did not deem the music now in use adapted to congregational singing, and consequently favored organized choirs. In his opinion Protestant Church music, except that of the English Church, has been retrogressing for the past twenty years. Other speakers followed upon the same subject, generally agreeing with Mr. SOUTHARD. The Convention closed with a concert in the evening, which was largely attended.

Bishop CLARK, of Rhode Island, delivered an address in the evening on "Oratorio Music as a Means of Elevating Popular Taste." At the close he was heartily applauded. The enthusiasm manifested during the closing proceedings would indicate very general satisfaction with the results of the Convention.

General Canby and the Virginia Senatorship—A Denial.

RICHMOND, Va., Sept. 23.—R. T. DANIEL, Chairman of the Conservative State Central Committee, publishes a card this morning stating that there is not "even the color of truth" in the newspaper statement that General CANBY ever intimated that the test oath would not be required if he (CANBY) could be made Senator.

The *State Journal* of this city announces that General CANBY will shortly publish a correspondence with many prominent citizens of Virginia, called forth by letters from them relative to the test oath, and extending back more than a month beyond the date fixed for the election. This correspondence has been denied heretofore, the regulations of the army prohibiting the publication of such letters without the consent of the Secretary of War. This consent has now been obtained.

The Young Men's Christian Association—State Convention.

SCHENECTADY, N. Y., Sept. 23.—The fourth annual State Convention of the Young Men's Christian Association of the State of New-York met here Tuesday afternoon. B. R. MCBURNEY, of New-York City, was unanimously elected President.

A State Committee of organization had been formed to establish new associations in places where none exist, of which JOHN F. PLATT, of Poughkeepsie, was chosen Chairman. The Convention adjourned to meet on the 1st of September, 1870, at Poughkeepsie.

The Capital Convention—Preparations.

St. LOUIS, Sept. 23.—The Executive Committee of the National Capital Convention, to be held here on the 26th of October, with members of the Press and other citizens, held a meeting to-night. The Governors of the following States have responded to their invitations, and will send delegations: Illinois, Iowa, Kansas, Nebraska, Oregon, Nevada, Arkansas, Louisiana and Missouri. The Governors of Maine and Indiana have declined to appoint delegates, but there will be representatives present from those States.

A Smooth Swindler Arrested in Hartford.

HARTFORD, Conn., Sept. 23.—A man calling himself Colonel T. B. MIKHOLOWSKI, who claims to have been a soldier in a New-York regiment, and also one of Colonel RYAN'S Cuban force, was arrested here to-day on the charge of swindling, he having attempted several confidence operations, and in one case securing $160 on bogus drafts on the United States Treasurer. He is about 30 years of age, of good appearance, and a smooth talker.

Supposed Leader of a Band at Cincinnati Arrested.

LOUISVILLE, Sept. 23.—A force of detectives made a raid upon the establishment of one HENRY A. MARCHAND, on Mark-street, and found a large quantity of nickels and a die used in their manufacture, which were all confiscated, and MARCHAND was arrested. It is believed that MARCHAND is a leader of a band of counterfeiters in the West, who have been circulating a large amount of spurious coin.

Fire in Pittsburg—Four Firemen Injured.

PITTSBURG, Sept. 23.—A grocery store in Allegheny City was burned last night. The proprietor was engaged in drawing burning fluid, which ignited and ran through the floor into the cellar, and afterward exploded. HENRY WATTS, a fireman, leaped from an upper window, and had his leg broken in two places. Four other men were hurt and burned while escaping.

An Albany Bank Cashier in Trouble.

ALBANY, N. Y., Sept. 23.—It is reported tonight that ADAM VAN ALLEN, Cashier of the First National Bank of this city, was arrested this afternoon on the charge of defrauding the United States Government by using canceled revenue stamps. He was taken before United States Commissioner PRETTINGHAM and admitted to bail in the sum of $5,000.

A Hartford Business Man Instantly Killed.

HARTFORD, Conn., Sept. 23.—JOHN G. MIX, well known in business circles here for forty years, was instantly killed to-day by the falling of a piece of timber, while he was superintending repairs in the basement of his residence. He was 67 years old.

A Southern "Difficulty"—A Negro Killed.

AUGUSTA, Ga., Sept. 23.—A difficulty occurred in Columbia County on Sunday between a plaintiff named BAKER, and a party of negroes, in which WM. JONES, negro, was killed. The published account represents that BAKER acted in self-defense.

Discovery of Coal Beneath Providence City.

To the Editor of the Providence Journal:

To-day, Sept. 22, I visited the Cove Foundry, for the purpose of witnessing the effective force of the Starkevant Blower, and my attention was called, by Mr. MCLAUGHLIN, well-borer, to the discovery of two beds of coal by him, in sinking a well for water in the foundry yard. Agreeable to his statement, the drill passed through a bed of coal fourteen feet thick, at the depth of 119 feet, and a second bed of coal of six feet in thickness, at the depth of 124 feet. He stated that there was not any intervening slates in the beds of coal. I examined the specimens of coal taken out, and judge that they contain eighty per cent. of carbon.

The above discovery proves what I stated four years ago, upon the discovery of the Cranston coal, that that bed extended in a northeasterly direction, like an undulating carpet, under the plains, and the City of Providence. The coal can [illegible]

[illegible] stop these outrages. The result is that [illegible] the Rio Grande.

Two men were arrested in Troy, on Tuesday, on suspicion of having stolen 4 horses which they were very anxious to sell; and on the same day a man was arrested in Pittsburg, Penn., on the charge of obtaining a coffin under false pretences.

GENERAL BUTLER.

Speech at a Massachusetts Agricultural Fair—The Backbone of Capital and Labor Discussed—The Legislature Lectured—Special Legislation Denounced.

General BENJAMIN F. BUTLER was the orator at the Worcester County Agricultural Society's Fair, at Worcester, Mass., which opened yesterday and continues to-day. His address was characteristic, and somewhat out of the customary line pursued by agricultural fair orators.

General BUTLER considered, as his theme, the aids given by Legislature to agriculture, and the relation which the labor of the citizen bears to that of the SOIL. After a word of introduction, he spoke of the general system of the strikes of artisans and mechanics, and called attention to the fact that none of these strikes or collisions have as yet taken place in farm labor, nor has such labor been affected by them, save in dangers, as the wages of labor, more or less skilled, have been partly raised. Proceeding to explain this, he examined first the causes and effects of these collisions of labor and capital.

CAUSES AND EFFECTS OF STRIKES.

No one can deny, he said, that in all mechanical and manufacturing industries the production—or, more strictly speaking, the capability of production—has increased tenfold within the last fifty years. The application of the steam-engine as a motive power, the improvements in machinery in the production of every manufactured necessary and nearly every luxury of life, have so cheapened their cost as to convert many luxuries into necessities. The facilities of transportation have brought the comforts of life to every man's hearth; and, of course, following as great increase of production, has come a corresponding increase of profits to the producer on that production.

Now, if with the profits on the products of mechanics and manufactures by mutual labor only or aided by crude machinery, it required—as a half century ago it did—the laborer to work from twelve to fourteen hours a day to obtain the ordinary means of subsistence, it would seem that, with this great increase of production from his labor aided by more perfect machinery, he might be able to obtain the same means of comfortable existence—precisely as they are cheapened by this very facility of production—with at least half as many hours; or, if working more hours, he should obtain greater rewards for his industry, so as soon to place him beyond the necessity of labor. But while in many cases it is true that the workman has become the master machinist and manufacturer, and has thereby obtained comfort and independence, as his is a great manufacturing country, yet it is impossible not to see that the condition of the mass of workmen is not much advanced; and these cases of the bettered condition of the master workmen have come, not from the increased profits of their own labor, but from their ability to employ and reap the profits of the labor of others, while we see the dividends or rewards which the capitalist or employer has received from this increase of manufacturing or mechanical production have created vast fortunes and enormous aggregations of wealth.

How are we to reconcile, with logic or economy, that there is not yet a fair division of the profits of mechanical and manufacturing labor between the capitalists and the workmen. The capitalist, as a rule, grows rich; the workman grows only a little more comfortable; and that comfort comes not from his ability, from the proceeds of the production of his labor, to buy some of the comforts of life at less prices in comparison with the wages he receives. Now, there are two ways in which an equal division of profits from the union of capital and industry can be made; one, in giving a higher price for labor, so that the workman would be enabled to be employed so long to obtain the means of a livelihood; and the other is, by shortening the hours daily which he works for the same pay, to will: the means of obtaining a livelihood. Therefore the struggle is now going on, not only in this country but abroad, in both ways, to find such equal division. On the one side, workmen are insisting that they shall have more pay; on the other hand, other workmen are insisting that they shall work less hours for the same pay, which is another mode of arriving at the same result.

WHY FARM LABORERS DO NOT STRIKE.

It must be first considered that there is a lack of increase in the capacity for production of the land within the last half century, as compared with the increase of production in everything which goes to make the necessaries of life coming from manufactures and the arts. True, the machine-reaper, mower, thresher and rake have added in a high degree to the labor of the farmer, but it cannot fail to be observed that almost all the improvements of agricultural machinery only aid him to gather the results of his toil, but do not make a spire of grass or blade of corn grow where there was not one before. The soil now is the same with which your fathers broke the furrow, plied the hoe, drove the spade, are the same. The cultivator and the contrivances have lightened in some degree your labors, but only in the thousandth part of a degree as compared with the production of the power-loom over the loom of a half century since. Therefore it is that there has been, and from the nature of things can be, no strike by the farm laborer for a larger share of the profits of farming, for there are no great profits to divide. The farm laborer does not ask to shorten his hours of labor, because with those hours shortened his capacity for production would not keep him from starvation. He does not combine to make the farmer pay greater wages, because any substantial increase of price would render employment of labor in farming quite impossible. Because of this want of increased production on the farm comes the well-known fact that the profits from agricultural labor are the least of any department of human industry. The discoveries of chemistry, the inventions of science have aided it in a degree; but still comes back to the farmer the normal and primeval condition that "in the sweat of thy face shalt thou eat the bread" (the labor of the steam-engine)—"shalt thou eat thy bread." The profits of investment of capital in farming and of labor on the farm are but little advanced from what they were at the beginning of the century. I by no means mean to say that farm wages have not risen, but they have risen because of the high prices paid in manufacturing, mechanical and commercial pursuits, and the higher rewards to be obtained by the investment and employment of capital in such pursuits. Hence it is that all our boys leave the farm to go into other business, hardly one remaining to take care of the homestead; and hence it is that the father encouraged his boy to leave the farm to become the broker, the banker, the merchant or the manufacturer—aye, and, too often, indorses a note or mortgages the farm to raise the capital with which the boy is to start in business. The records of mercantile and business pursuits show that only one in a hundred is in a high degree successful, if the boy is unfortunate, then the old homestead goes, and the father and the mother totter down to their graves in helpless poverty, oppressed by the thought that they have been ruined by the darling son to whose haste to be rich they themselves have quickened and urged.

WHY AGRICULTURE PAYS SO LITTLE.

Starting with the thesis—as we must do—that all the actual means of subsistence to man must come out of the earth at first, and that all the other pursuits are only to add to his comforts and luxury, or to obtain to the individual more than an equal share of such comforts and luxuries, and then comparing the legal and mechanical machinery which has been devised to assist those other pursuits, it will be seen at once why agricultural production has not been in greater degree increased, and is with us among the least remunerative of employments. Nothing more forcibly illustrates this than a glance at the aids which other occupations receive from legislative action. Out of nearly six hundred acts passed by the last Legislature only one was to promote agriculture, and that was to give the Board of Agriculture power to employ a clerk and to engage lectures. This was all the aid, direct or indirect, that the farming interest of Massachusetts received from the Legislature of 1869.

"What one penny-worth of bread only to all this stock?"

The direct expenditure in behalf of agriculture, $1,400! while $7,000, in addition to $3,000 heretofore appropriated, was in the same year appropriated for the purpose of completing the *History of the Insectivorous Animals of Massachusetts*, which being interpreted is the history of animals lacking backbone. He by no means wished to urge that this last expenditure was unnecessary; partly because, although that kind of work is not connected with agriculture, yet, as it is supposed that the politicians are generally included in that class, so therefore the republication of such history might have become a sort of State necessity.

TOO MUCH SPECIAL LEGISLATION.

Agriculture asks for no special legislation. It is not benefitted by any legislation whatever except such as shall preserve the morals of the people and the rights of property and person. Indeed, the best legislation to aid the tilling of the earth is that which lets it most severely alone. But what ought to be complained of is the fostering of every interest by special laws, giving to them every power that law can give to association and combination—all interests save that of agriculture. Looking through this large volume of acts, we find he act in aid of labor or authorizing any association of labor. We have already seen that agricultural labor may not be benefited by association; but it by no means follows that manufacturing and mechanical labor might not be so. It has been shown that the former cannot be helped by legislation. What he should demand in this he should not be impeded by legislation. Any law which permits or assists any individual of society to get his living without labor, is a tax direct, inevitable and oppressive upon the laboring interest of the community, and is an injustice to every farmer and every farmer. This system of special legislation which has grown up until it takes the Legislature six months in the year to pass laws to guide the State for the other six months, has come to be an evil, to alleviate, bye, to eradicate which I call upon the only [illegible] the farmers of Massachusetts.

RAILROAD CORPORATIONS.

In reply to those [illegible] I may be asked, he said, as it is the [illegible] of those engaging special legislation, that [illegible] railroads and other same [illegible] of corporations, the agricultural interest with the [illegible] that the special legislation of which [illegible] complained has built up a system of railroads over the State which have [illegible] property. A large part of this may be admitted to be true, and yet it is no answer to our argument. The legislation which has built railroads, from which capital and capitalists may derive large dividends and immense fortunes, only and does indeed benefit the State, and in a very eminent degree to the farmer and producer. Dividends of ten or fifteen per cent. railroad stocks, amounting from one to two per cent., are only to be sustained by rates of fare which are burdensome and oppressive to those needing the means of cheap transportation to get their produce to market. And is it not a fact that the railroads find it for their interest so to manage their affairs and to adjust their tariff of charges as to favor the long lines of transportation—thus to enable the wheat and flour and corn of the West to come to Boston for shipment, and not to New-York—rather than in favor of the local agricultural interests of Massachusetts?

Again, the undertaking of one of the most gigantic engineering enterprises of the age—the boring of a tunnel five miles through a mountain—is not, if I understand it, although the millions required for the accomplishment of the object are to come from taxation, intended to build up the local interests of Massachusetts farmers, but is to enable a through line to the great West in the interest of capital invested in the banking, mercantile and manufacturing pursuits of the East. Railroads have now become the actual common highways of the country, and should be managed for the benefit of the people where they lead not, as now, for the benefit of the few having them in charge, and scarcely even in behalf of the stockholders. We are not complaining of railroads; we are not complaining of business enterprises; but we do complaining of those laws and that theory of law-making which gives one man an advantage over others.

COMMODORE VANDERBILT.

Let us take an illustration. It is said there is a gentleman in a neighboring State, who, at 21, was employed in conveying passengers with a single pair of cars from New-Jersey to New-York, who, by his enterprise—by taking advantage of the laws regulating the means of transportation of passengers and merchandise—at the age of three score and ten has accumulated as many millions of dollars. Now we do not object to the enterprise, the industry and energy which can accumulate as much; but what we do object to is, that the laws regulating what has become a principal necessity of life—the transportation of food and merchandise and the person—the common highways of the people, by land and by sea—can be so manipulated that any man in a single lifetime, by any means, can accumulate such a fortune. He certainly have made no great wrong to any; he should be equal laws, will make it possible for one man so to overtop all others in wealth, which must be produced by labor from the earth at last!

STOP MAKING CORPORATIONS.

This state of things has not yet gone past remedy. Let us take timely warning. Let us examine carefully into the evils of this system of legislation. Let us reform them altogether. One means of preventing too much legislation would be meetings of the Legislature once in two or four years only. We have a system of general laws, come down from our fathers, with all their wisdom perfected now through more than eighty years of careful revision, ample for all the general wants of the people; ample for protecting the rights, to protect person and preserve property; ample for all purposes for which laws are good. Why is it then that we should spend so much time in making others, or rather in doing those legislative acts which are only the means of private advancement? Many years ago the excuse for acts of incorporation was that there was not sufficient capital in the hands of individuals to enable the undertaking of large industrial enterprises, and therefore it was necessary to associate the means of many for such purposes. Now, as we have seen, there are accumulations of individual wealth sufficient for all purposes—many and many individuals carrying on larger industrial enterprises than corporations; so that the reason failing, what can be said why the making of corporations should not stop? Are they now anything more than means by which people can band together to carry on enterprises of which, if successful, they reap the benefit, and if lost or unproductive, by getting rid of individual responsibility, they throw the burden of the failure on innocent persons, and generally upon the industrial classes?

While true it is that agriculture has all its discouragements and all its difficulties, and that it never can be the most lucrative employment of men, yet the tillage of the land will ever be the favorite one. Nearly all men in professional or mercantile or manufacturing life look forward, as their end and object and ambition of their exertions, to a time when they may leave the turmoil of business and find the tranquil delights of old age in the culture of the land. To become farmers, in fact, is the end of all their aspirations, of all their endeavors, of all their enterprises. The shipmaster who plows every ocean, visits every country, observes the fertility of every soil, tastes of the fruits of the tropical clime, wanders amid the monuments of grandeur and civilization of the old world, still at last returns to the cultivation of the land, even the sands of Cape Cod. It seems the yearning desire of the human heart to return to the bosom of mother earth. Well may it be so; for to the purifying and revivifying influence of the farm and the country we owe most that is stable in government, most that is patriotic in thought and loyal in endeavor. The battles for the Union in the late rebellion were fought in a great degree by the farmer boys of the country. A majority of those that went forth at the first call left the plow in the furrow or dropped the shovel or spade in the garden. The corruptions, the vices of cities have so far not reached the land; and to the country the statesman must look for the stability and safety and purity of the laws. There is a reason why this must be so. In the country there is time for reflection, time for thought. In the city, amid the whirl and turmoil of the clashing pursuits of aggregated men, there is time only for the perceptions. In the city man lives guided by his eyes and his senses; in the country he lives in his reflections and ideas. The occupation of tilling the farm, I need not say to you, gives health and strength to the body, as well as purity to the mind. Whoever, tilling the soil, is inclined to look with envy upon the success of his neighbor in the accumulation of wealth, let him console himself with the remembrance that at last that neighbor will yearn to return to the soil again to till it, and in it to find his last resting place.

Arrival of the Steamship Ville de Paris.

The steamship *Ville de Paris*, which left Havre Sept. 8, and Brest Sept. 11, reached this port yesterday. For late files of continental journals we are once more indebted to the courtesy of Captain BURNONT.

The Methodist Book Concern—A Card.

The undersigned hereby declares that the allegations contained in sundry articles published in the various newspapers of this City and elsewhere, charging with fraudulent transactions in purchasing supplies for the Methodist Book Concern, are without foundation, and are false, as will be fully shown in due time.

S. J. GOODENOUGH.

NEW-YORK, Thursday, Sept. 23, 1869.

MANY CAPITALISTS ARE INVESTING in the bonds of the Danville, Urbana, Bloomington and Pekin Railroad Company, considering them the cheapest security now in the market. Both the principal and 7 per cent. interest are payable in gold.—*New-York Sun.*

It may be interesting to our readers to know that the new and stylish colors for overcoats in Meltons, (the most popular fabric of the day,) are introduced this week by our leading retailer in ready-made goods, BALDWIN, the Clothier, corner Broadway and Canal.—*New-York Express.*

Disgusted thousands will learn with delight that in the place of the filthy hair dyes and colorers which a regard for health and comfort has compelled them to abandon, PHALON & SON have brought out, for the name of VITALIA, OR SALVATION FOR THE HAIR, a newly-discovered article which has no drawbacks, and is guaranteed to restore gray hair to its natural shade in a few days.—*Advertisement.*

Hair Dye. Hair Dye. Hair Dye.—The genuine W. A. BATCHELOR'S Hair Dye is the best in the world—the only perfect dye—harmless, reliable, instantaneous; black or brown. Sold everywhere, and properly applied, at BATCHELOR'S Wig Factory, No. 16 Bond-st., N. Y.

Miller & Co.'s Ladies', Misses' and Misses' boots and shoes, all styles, moderate in prices, at MILLER & CO., No. 3 Union-square.

Fuller & Warren and "Goodrich" Tuck Measurers and Crimpers for Sewing Machines, No. 629 Broadway, New-York. L. W. BARNUM.

The Autonomical Eyeglass Adjusts itself to any form of nose, with less pressure than any other. JAMES PRENTICE, Optician, No. 154 Broadway.

A. Morton, 95 Maiden-lane, New-York.

MORTON'S GOLD PENS.

MARRIED

SMITH.—At sea, on Tuesday, Sept. 14, after a short illness, CYRUS A., son of Cyrus P. Smith, of Brooklyn, and son-in-law of Isaiah Hopkins; also, at the residence of F. W. Dover & Co.

Notice of funeral hereafter.

SADLIER.—On Tuesday, Sept. 21, at Far Rockaway, L. I., JAMES SADLIER, of the firm of D. & J. Sadlier &

REAL ESTATE TRANSACTIONS.

To-day will be, as yesterday was, entirely quiet, for no sales will be attempted. The results of those made earlier in the week were in all cases entirely satisfactory, and have encouraged owners of other pieces of suburban property to place them in the hands of the auctioneers. Several very valuable pieces have been added to those already on the books, to be offered between now and Nov. 1.

Next week promises to be a very brisk one. Several sales will be made of more than ordinary interest, and enough suburban property will be offered to keep busy all who are interested in such sales.

Transfers of Real Estate.

REAL ESTATE AT AUCTION.

O. H. PIERSON, Auctioneer.

BY A. D. MELLICK, JR., & BRO., Auctioneers and Dealers in New-Jersey Real Estate, No. 36 Pine-st., New-York.

THURSDAY, Sept. 30, At 1:30 P. M., PEREMPTORY SALE of 60 BUILDING LOTS at BAYONNE, N. J., By order of George Pomeroy, Esq.

Only twenty-five minutes from the New-York side of the river, with over forty trains daily by the Central Railroad of New-Jersey.

These lots are beautifully situated at the highest point on Bergen Neck, commanding magnificent views of New-York City and Bay, the Narrows, and the Islands of the Harbor; are very near the station, and in the immediate vicinity of churches and improvements; streets graded, and the property generally in fine condition.

Special train from the foot of Liberty-st. at 1:15. Collation on the arrival of the train.

Efficient detectives will be in attendance.

Maps and passes ready seven days before the sale at the office of A. D. MELLICK, JR., & BRO.

J. JOHNSON, Jr., Auctioneer.

HO! HO! FOR RAHWAY! JOHNSON & MILLER invite clerks, mechanics, and all who wish to secure delightful homes at moderate prices.

To meet every demand on their GREAT FREE RIDE AND FREE LUNCH EXCURSION TO RAHWAY, OF FIVE HUNDRED SPLENDID BUILDING LOTS, situate at the SIX ROADS, THIRD WARD, CITY OF RAHWAY, N. J., TUESDAY, Sept. 28, 1869,

on terms so easy and accommodating that all may secure in that delightful place homes of their own. This will be the best chance of the season. No underbid allowed. Be sure to go. A day in the country will be beneficial.

The lots to be sold are on a gentle slope, rising from the railroad, in the most delightful part of the City. Rahway has a population of 6,000, with N.-York by thirty-four daily trains over New-Jersey Railroad. No place in the vicinity of New-York has greater natural advantages. It has extensive manufacturing interests; population of twelve churches; excellent schools; all leading streets watered, flagged and paved with Belgian pavement.

HOW TO GO.—Take special train, which will leave foot of Cortlandt-st. ferry-house, with N.-York at 11 o'clock on morning of sale, TUESDAY, Sept. 28.

Free excursion tickets may be had of JOHNSON & MILLER, No. 25 Nassau-st., New-York, or of GEO. RIJAQUES, Esq., No. 308 Broadway, New-York.

GREAT NECK AND SHIPPAN EXCURSIONISTS are invited to attend JOHNSON & MILLER'S GREAT RAHWAY SALE, TUESDAY, Sept. 28. Also their GREAT LINDEN SALE, JOHNSON & MILLER, No. 25 Nassau-st., New-York.

Free tickets are now ready at the office of JOHNSON & MILLER, No. 25 Nassau-st., New-York.

FINANCIAL.

NOTICE! UNION PACIFIC RAILWAY COMPANY—SOUTHERN BRANCH, (Second Valley Railroad, Kansas.)

Pursuant to the Deed of Trust made by the Union Pacific Railway Company, Southern Branch, under date of New-York, Nov. 1, 1868, to the Mortgagee therein named, to secure the payment of the Mortgage Bonds therein described by the mortgage, among other things of about 1,600,000 acres of land,

We hereby give notice to the bondholders under said mortgage that we are now prepared to redeem twenty-five thousand dollars ($25,000) of said bonds with money derived from the sales of land made. That the said bonds will be paid on the 1st of April, bonds to that amount until and including the 31st day of October, 1869, at our office, No. 28 William-st., (Room No. 5,) City of New-York.

(Signed,) RUSSELL SAGE, N. A. COWDREY, Trustees. NEW-YORK, Sept. 16, 1869.

OHIO AND MISSISSIPPI RAILWAY COMPANY, OFFICE NO. 52 WALL-ST., NEW-YORK, Sept. 24, 1869.

THE ANNUAL MEETING OF THE bond and stock holders of the Ohio and Mississippi Railway Company, for the election of Directors for the ensuing year, and the transaction of such other business as may come before the meeting, will be held at the office of the Company, No. 223 West 4th-st., Cincinnati, Ohio, on THURSDAY, Oct. 14, 1869, at 10 o'clock A. M., when the transfer books will be closed from 3 o'clock P. M. on the 30th day of September, until 10 o'clock A. M., on the 15th day of October.

By order. E. D. HAMMOND, Secretary.

CAUTION.—BANKERS, BROKERS AND others are cautioned against negotiating the following bonds, stolen on the 12th or 13th July last, payment of which has been stopped: United States 5-20, 1865, Nos. 179, 180, 229, four bonds, $1,000 each; Tennessee 6 per cent. (new,) No. 1,963, $1,000; City of Memphis, five improvements, indorsed W. Fuller, Jr., Cashier, Nos. 2,096, three bonds, $1,000 each; Coupons of United States, 5-20 of 1867, Nos. 126, 229, 144, inclusive, eleven, of $50 each.

A liberal reward will be paid on amount recovered.

THE MAST HOPE DISASTER.

Trial of James Griffin, the Engineer—Detailed Statements of Witnesses—Summing Up of Counsel.

The September Term of the Pike County (Penn.) Court opened at Milford on Monday, GEORGE R. BARRETT, President Judge of the Twenty-second Judicial District, presiding; GEO. T. HELLER and WM. WESTFALL, Esqs., Associates.

The case of Engineer JAMES GRIFFIN, under arrest for alleged criminal negligence in causing the railroad disaster at Mast Hope, on the 14th of July last, by which seven lives were lost, was brought to the attention of the Grand Jury by JOHN D. BIDDIS, Esq., District-Attorney. The Grand Jury came into Court on the 21st, having found an indictment against GRIFFIN for misdemeanor, under the Railroad law of 1868; conviction under that act involving the penalty of imprisonment in the State Penitentiary for a term not exceeding five years, and a fine not exceeding $5,000.

On the 22d GRIFFIN was arraigned and pleaded "Not guilty," and the trial commenced. A formidable array of counsel appeared in the case—for the Commonwealth, JOHN D. BIDDIS, Esq., District-Attorney Hon. D. M. VAN AUKEN, WM. H. JESUP, Esq., of Montrose, and G. E. DIMMICK, Esq., of Honesdale. GEORGE E. REED, Esq., as officer of the Erie Railway Company, and J. M. ALLERTON, Esq., as attorney for the Company, were present in Court assisting in conducting the prosecution. The prisoner's counsel were Hon. GEORGE W. WOODWARD, of Wilkesbarre; RALPH W. LITTLE, Esq., of Montrose, and JOHN HYCE, Esq.

The following persons were impanelled as a jury to try the case: Peter Wagner, Joseph C. Lattimore, Randal Kelly, Isaac W. Van Gordon, George Pearson, John T. Lee, John Gould, John W. Frasier, Nelson Dewitt, Frank Riley, Albert S. Jagger, Oliver Pellett.

The Court-room was densely thronged with spectators, among whom were many ladies, and the deepest interest was manifested in the case. Among those present were GRIFFIN's wife and two little children, and a number of his friends from Susquehanna Depot, where he resides. GRIFFIN himself, a well-appearing, middle-sized man, sat by the side of his counsel paying close attention to the proceedings, and evidently anxious as to the result.

Mr. JESSUP opened the case for the Commonwealth with a brief statement of the alleged facts in the case as bearing against the prisoner. His statement closed, he called the first witness for the prosecution:

TESTIMONY OF SUPERINTENDENT REDINGTON.

Geo. *S. Redington* testified in substance as follows: Griffin was employed by the Company as locomotive engineer on train No. 39, a freight train; Griffin's train was to pass Mast Hope at Mast Hope for passenger trains Nos. 1 and 3 to pass. (Rules and regulations of the Company produced.) and witness testified that they were in force on the 14th of July; on the morning when I arrived there, portions of train No. 3 and train No. 39 were there, the freight engine across the track, and a number of cars and the depot burned; I saw also, what I supposed to be the remains of several persons.

Cross-examined.—I do not know how long Griffin had been in the employ of the Company; I suppose he was in the employ of Company when I came on Division; did not know him; train dispatcher, in my absence, has charge of starting trains; W. L. Kimball was engine dispatcher, and Benj. Thomas train dispatcher on the Delaware Division; heard train No. 3 was behind time; do not know; did not see Griffin at Mast Hope; I do not think I saw him at Lackawaxen; I saw way to disaster; where accident occurred there was an ordinary curve; the duty of the engine dispatcher is to see that engines are ready to go out, and engineers are produced.

TESTIMONY OF J. W. GUFFY.

Am Assistant General Superintendent of the road. (Book shown to witness.) These are the general regulations for running trains.

TESTIMONY OF J. D. BROWN.

On the night of July 14, 1869, I was in the employ of the Erie Company as conductor of extra No. 39; started from Port Jervis about ten minutes past eight P. M.—eight o'clock is regulating time; that night I ran as far as Mast Hope; the engineer of the train was James Griffin; fireman, Milton Deane; flagman, Edward Smith; I was required to remain at Mast Hope until trains Nos. 1 and 3 had passed. We took the switch—the switch is nearly half a mile long. The rear end of the caboose was about thirty car lengths from the east end of the switch. I had forty-two cars and caboose that night. After I passed in the switch, I closed the switch and went into the caboose, and remained there. I was in the switch at 10:46. The table required me to leave Mast Hope at 11:27. No. 1 was due there at 10:46. It came there about 10:50—seven or eight minutes late. No. 3 was due there at 11:12. I think it arrived at Mast Hope twenty-five to twenty-seven minutes late. When they passed my caboose it was about 11:48. I heard the whistle of No. 3 when it was coming. I was on the hind end of my train; my train was not in motion when I heard the whistle; it was a very long and loud whistle, more so than usual; I did not give any signal to my engineer to start the train when No. 3 was passing; gave no authority to any person to give the signal to start; my train was not in motion when engine of No. 3 passed my caboose; I was standing at that time on rear portion of my train, with lamp in hand; just as the first car of No. 3, next to tender, passed, I observed my train make a forward movement; I should judge it moved about four or four car lengths—a car length is thirty-two feet; I next felt a sudden stoppage of train; the engine of train, I should think, would move a full car length before caboose would move; when I felt the jar, I immediately ran forward for head end of train; could not see head end of train from caboose; I started under supposition that my train was off the track; about half way up I met flagman of No. 3; on going further I saw a portion of passenger train standing on track, and partly on fire; I went back to my caboose for a water bucket and an ax; I went back to the train, and tried to use them; the engine of No. 3 was in the ditch, partly covered up with the wreck of the baggage car and the first coach; the fire was on the track, underneath the cars, at the platform of the depot; the forward truck and drivers of my engine were off the track, against the sleeping car; I saw the trucks of six cars that had been burned after the fire; the smoking car was telescoped by the baggage car; by telescoping I mean that one car had run inside of the other; the place of the conductor is in the caboose, and I was in the caboose when I heard whistle of No. 3; saw the headlight of engine of No. 3 twenty car lengths; it was less than a minute from the time I heard the whistle till the engine of No. 3 passed my caboose; when I heard the whistle I told my two brakemen to get out on the train; one got out just as the train passed, and the other was still in the caboose when we stopped; I do not know what became of the flagman; I remained at Mast Hope about two and a half hours—as long as I thought I could be of any use, and then went to Lackawaxen on foot to report to Division Superintendent; the depot at Mast Hope was burned.

Cross-examined.—It was a still, dark night, a warm July night; did not go to sleep in my caboose; I have no signal by engineer to stop train when I found it in motion; I do not generally use bell-rope to signal on long train, generally send a man forward; the burning cars were about sixty-five rods from the river; there was no water nearer; I gave my axe to a man; I saw no use for the passengers who could not be got out were jammed in fast by the telescoping of the cars; if there had been plenty of axes and men to use them, I think that the passengers who were burned could not have been got out, as the fire would have reached them; I saw Griffin was my engineer only for that night; I did not see anything done toward releasing the passengers or stopping the fire, as I went to work to save the rear passenger coaches by removing them from the burning wreck.

TESTIMONY OF E. C. SMITH.

I was flagman on first extra to No. 39 on the night of the accident; I got off at the switch at Mast Hope to let train in, and then went to forward end of train; I was on the engine a few moments, and then went on the platform of the depot; went there for the purpose of opening the switch to let my train out as soon as No. 3 had passed; the spur was right for trains to pass on the main track; I heard the whistle of No. 3 as it came; also I saw the head lights of the engine as it approached on the curve; my light being poor, I sat down on the platform to turn up the wick for more light, when No. 3 came along; I was sitting with my back toward No. 3; I was knocked senseless; I was thrown over a house near by; a brakeman picked me up; before the collision our engine was standing about two car lengths from the main track; did not give any signal to engineer to move forward, nor did I see any other person give signal.

TESTIMONY OF MILTON BRADE.

I was the fireman on the engine of the freight train spoken of; on our arrival at Mast Hope that night, the train went on the side switch; we were about two car lengths from the main track; I saw train No. 3 within nine or ten car lengths of my engine; I did not hear No. 3 whistle, as we had the safety valve open, and the steam escaping from car engine prevented our hearing the whistle; we were on the engine, moving toward the main track, when I heard the train coming; Griffin was on the engine, moving it forward; we got on the frog, where the spur comes on the main track, when the other train struck us; when I discovered No. 3 nine or ten feet off, we were on the spur; at the time I had my fire-rake in my hand; I asked Griffin where he was going; he gave me no answer, and I concluded it was best for me to jump off; I think if he had heard me he would have answered; I jumped off the engine on the side opposite the main track; should think No. 3 struck us about the time I got off; No. 3 struck the forward end of our engine about the cylinder, and No. 3's engine was thrown over the bank; all but three or four of the train were burned; after the collision I went to my engine and met Mr. Griffin, the engineer; spoke to him and went then to see if anybody was hurt; the fireman of the passenger train came to me with his hand burned, and I tied it up; in a short time saw the fire in the cars; Griffin was on the engine the whole time we remained on the switch; our train started a little before I saw No. 3 approaching; after the accident I was on engine with Griffin and remained about five minutes; both got off together; do not recollect seeing him again that night.

Cross-examined.—It was a warm, murky dark night; we were on the switch over half an hour; I slept before No. 3 arrived; she woke me up; don't know whether Griffin was asleep; think he was also asleep; when I spoke to Griffin I think if he had not been asleep he would have answered me; after the accident the conductor, brakemen, passengers and people near by, were at the track; did not use people bring water, or endeavor to extricate passengers, as I was engaged in pushing the cars back; but a short time before No. 3 came Griffin was leaning his head against the backboard in a half reclining position; after the collision the first words Griffin held to me was, "My God, Milt., what's this run into us?" I then went off to look after the ruin; to start the engine he had to pull the lever; he could do this sitting down, but not in the reclining position he was in; when I returned to the engine he was sitting down; I did not start the engine.

TESTIMONY OF CHARLES COFFIN.

I was engineer running train No. 3 West; left Port Jervis at forty-eight minutes past ten P. M.; was twenty-eight minutes late; I ran the distance from Port Jervis to Mast Hope—twenty-eight miles—in one hour; when I came to Mast Hope I gave the station signal—a long whistle; about half or three-quarters of a mile from station, I should judge; I saw the freight train standing on the switch; when I passed the caboose I did not see anything wrong. This witness repeated the story of the disaster as already given.

At the conclusion of the testimony the counsel proceeded to sum up.

The Carr's Rock Disaster.

JOHN BOWEN, charged with causing the Carr's Rock disaster on the Erie Railroad, pleaded guilty on Wednesday in the Court of Oyer and Terminer at Milford, Penn.

Speaker Youngclove.

NEW-YORK, Tuesday, Sept. 21, 1869.

To the Editor of the New-York Times:

Permit me to express to you the amazement which I, in common with many men of all parties feel, at the unwarranted attack of your correspondent "Chemung," upon the character, political and private, of THURMAN G. YOUNGLOVE, Speaker of the Assembly.

If his statements were true, I should not object to so severe an attack in a Republican paper, upon a prominent Republican official; for, political friendship should not be permitted to cover private or official corruption. The private character of Speaker YOUNGLOVE is above reproach. No man is more implicitly trusted with important interests, in the community in which he lives, and by those who should, and do, know him. He is often selected to assume the delicate duties of trustee and executorship, because of his well-known integrity, while his business position as President of a large manufacturing company, and also as President of a national bank, indicate the confidence which those place in him whose interests are involved in the management of these institutions. The remark of "Chemung" that "he is a bold, reckless and unscrupulous man," contains a selection of epithets directly opposite to the real character of the Speaker; who, on the contrary, is a quiet, mild, considerate and conscientious man, and highly regarded in the church of which he is an efficient member.

One of the reasons given by your correspondent for the faith that is in him is, that the Assembly over which the Speaker presided, acquired an awful reputation for venality and corruption. Accuse your own Assembly, if you choose, but, pray, do not hold the Speaker responsible for its acts, when the scope of his office merely is to put the questions brought before it to vote. But the great trouble with your correspondent is, it seems, that Mr. YOUNGLOVE, as is alleged, used the influence of his office in aid of the election of Mr. FENTON as Senator, instead of Mr. MORGAN. If Mr. YOUNGLOVE had, instead, used the influence of his office to insure the election of Mr. MORGAN instead of FENTON, the quill of "Chemung" might never have been plucked from its native goose, for anything it would have ever written against the action of the Speaker in that respect. "It was openly charged at the time that positions on committees" were offered for votes, says "Chemung." It was openly charged, yes! that $250,000 in cash was used on behalf of Senator MORGAN in that struggle; that twelve members of Congress were at Albany to lobby for him; and that the whole power of the Whisky Ring was brought to his aid. But do these charges, on either or both sides, become facts simply because they are "openly charged?" And yet this is the kind of evidence on which your correspondent "Chemung" has based his assault against Speaker YOUNGLOVE. It so chanced that, after reading this communication of "Chemung," the first two men I met were two Democratic Ex-Senators, who both declared that they had never known or heard of anything to impugn the private or political integrity of Speaker YOUNGLOVE. A REPUBLICAN.

The Bank Troubles in Quebec—Another Defalcation Reported.

From the Quebec Mercury, Sept. 20.

The following is published as a correct statement of facts in connection with the recent defalcation: Mr. CHRISTIAN, Inspector of the Bank of Montreal, in the course of his inspection, found reason to apprehend irregularities of a serious character on the part of the Manager, Mr. HARRIS. These irregularities were carried on and concealed from time to time by the exchange of accepted checks between the Manager of the Bank of Montreal and the agent of the city, serving to cover from one period to another the overdrawn account of E. SANDERSON & Co., brokers, in this city. Messrs. SANDERSON & Co. having, it is said, met with heavy losses by speculations in New-York, (principally in stock of the New-York Central Railroad,) had, it seems, to resort to this means of covering their banking account. Mr. HARRIS, the Manager of the Bank of Montreal, is confident that these irregularities were discovered, left for the United States. The gross amount of loss incurred reaches $140,000, which falls mainly upon or involves the Bank of Montreal, the City Bank and the Bank Nationale. The Bank of Montreal disputes the validity of the acceptances represented by the initials of their Manager, and as to the Bank Nationale, it seems they are involved in the dispute only so far as to which party is liable to them—the City Bank, who deposited these checks, or the Bank of Montreal, whose Manager initialed them. The Bank Nationale has paid up its acceptances. The amount in question between the City Bank and the Bank of Montreal is about $95,000.

It has been discovered that Mr. EDWARD H. AHERN, employed as a clerk in the Quebec agency of the City Bank, is a defaulter to the amount of $40,000, and a warrant has been issued for his arrest, but it is not likely that he will be apprehended, as he is reported to have left for the United States on Saturday. The defalcation has caused much astonishment, as Mr. AHERN was generally considered a respectable, trustworthy young man of regular habits.

Burning of a Well-filled Petroleum Station.

At about 2:30 o'clock last night an oil train on the Erie Railway at Penhorn, N. J., caught fire, and was destroyed, with 2,000 barrels of oil and a large amount of property that was situated near the track. The place at which the disaster occurred is a collection of oil tanks, sheds and platforms situated two miles west of the Bergen Tunnel, and owned by the Erie Railway Company. A train of tank cars loaded with crude oil was backed down to the "City" at the hour named, and one of the car tanks having been uncovered preparatory to drawing off the oil, the light of a workman's lantern came into immediate contact with the escaping gases. An instant explosion was the result, and the flames spread with such rapidity that eleven cars were within a short space of time enveloped. Three cars, with the locomotive, were detached and moved away from the burning mass, and the fire spread no further. The large iron tanks, holding thousands of barrels each, were in close proximity to the flames, and narrowly escaped destruction. Fire companies from Hudson City, West Hoboken and New-Durham were present, and at midnight they had succeeded in nearly extinguishing the flames. The track, however, was burned; several small buildings were destroyed, and trains passing over the road were delayed. The loss is estimated at $20,000 to $30,000.

Defalcation of a Well-known Banker.

The President of the Stock Exchange yesterday read to the Board a communication from a member of the large banking firm of VANDERVEER & Co., of No. 17 Wall-street, announcing that they would not be able to deliver either the stock or the gold for which they had contracted. The letter explained that Mr. BRADLEY, a junior partner of the firm, had absconded with all the assets, leaving the firm in such a condition that the firm was unable to tell what were its assets or liabilities. Mr. CHARLES VANDERVEER, the latter said, is now in St. Louis, but has been telegraphed for. His brother has gone in pursuit of BRADLEY. In conclusion, the letter asked that the Board make all due allowances for the firm until they could ascertain something about their business. The amount of the defalcation is not definitely known.

LOCAL POLITICS.

Kings County Republican Assembly District Conventions.

The nine Republican Assembly District Conventions of Kings County met last night for the purpose of electing delegates to the Syracuse Convention to be held on the 29th inst. The following were chosen:

First District.—State—Isaac Bourne, C. R. Phillips. Judiciary—L. M. Peck, M. C. Earle, J. B. King.

Second District.—State—Joseph Reeve, A. B. Thorne, Edward Coburn, R. L. Sanderson. Judiciary—Hon. Theodore Hinsdale.

Third District.—State—Julius E. Ludden, Jas. Fairbairn, Thomas Earle. Judiciary—Chauncey M. Felt, E. J. Spooner, Wm. Weston.

Independent.—State—Wm. H. Burleigh, E. D. Webster. Judiciary—Charles Condit, John Frelkin, J. B. Brinsmade.

Fourth District.—State—Ira A. Kimball, John Williams, Wm. Richardson. Judiciary—George Thomas, John Q. Adams, A. B. Richardson.

Fifth District.—State—H. E. Wheeler, Jesse C. Rowan, A. P. Higgins, H. P. Crocker. Judiciary—Wm. W. Goodrich, Timothy C. Crouse, Addison G. Rice.

Sixth District.—Convention adjourned until to-night.

Seventh District.—State—George B. McGrath, Charles F. Raymond. The Convention failed to agree upon the other delegates, and adjourned until to-morrow evening.

Eighth District.—State—A. M. Bliss, George C. Bennett, D. Lyster. Judiciary—C. Ferry, J. Wilkeyson, S. L. Carlisle.

Ninth District.—State—A. G. Williams, John Oakey, J. L. Guischard. Judiciary—Charles Jones, J. W. Stillwell, John Whitelaw.

Tenth District.—State—Geo. H. Davenport, John Ryce, Barnett Johnson. Judiciary—A. E. Stillwell, Jno. Matthews, Henry Miller.

It will be observed that some of the Conventions elected one and some three delegates to the Judiciary Convention. This difference of action resulted from misunderstanding on the part of some of the delegates. The Judiciary Convention has not yet been ordered by the General Committee, and the delegates elected thereto were so elected in anticipation of that order.

Thirteenth Ward Republican Association.

At a meeting of this Association at Ondordonk's Hall, corner of Grand and Clinton streets, last evening, resolutions were adopted approving the action of the Central Committee, in adopting a plan for a new enrollment and a reorganization of the Republican Party in December next.

German Democratic Club of the Twenty-second Ward.

The German Democrats of the Twenty-second Ward met at No. 249 West Forty-second-street last night, and organized a club for the ensuing State and charter elections. The following are the officers of the club: Colonel A. F. WUNSCHEL, President; ROBERT GREENTHAL and H. EITZEIN, Vice-Presidents; JOHN KROPACK, Secretary; FRANZ UNGER, Treasurer. The main business of the evening was the nomination of a German-American citizen of the ward for Civil Judge of the Seventh Judicial District. Mr. H. LOEWENBERG was nominated as candidate, and it was resolved to urge his nomination by the Tammany Hall organization.

Seventeenth Ward German Democratic Club.

This Club last evening nominated Mr. RICHOLL for Civil Justice of the Fourth District. The Club also issued a printed platform declaring its intention to support for office only honest citizens irrespective of their party claims; and also declaring the resolve of the Germans of the Seventeenth Ward to support to the utmost the claims of German American citizens for office. It was resolved to support the movement for the introduction of the study of German in public schools.

Queens County Delegates to Republican Conventions.

On Wednesday afternoon a Convention was held in Jamaica, to choose delegates to the Republican State and Judicial Conventions. To the State Convention the following persons were delegated: Peter Haslam, Newtown; William R. Jennings, Jamaica; Leonard Hendrickson, Hempstead. To the Judicial Convention the following persons were delegated: Theodore Cogswell, Jamaica; George F. Sherman, Newtown; J. S. Snedeker, Hempstead.

The Rosendale Hotel Murder—Trial of Wallace McDaniels for the murder of Thomas E. Corwin, at the Rosendale Hotel, near McComb's Dam, Morrisania, on the 22d of May last, was commenced in the Court of Oyer and Terminer at White Plains yesterday, J. C. DYKMAN, Esq., District-Attorney, appearing for the people, and CHAUNCEY SHAFFER and JOHN BAYNE, Esq., for the prisoner.

The following witnesses were sworn during the case said it would appear that McDANIELS and CORWIN resided at the same house. McDANIELS' wife, or the woman whom he claimed as his wife, and who is known here in this case as Mrs. JULIA A. ANDREWS, also lived there. Two witnesses testified that they had heard McDANIELS and CORWIN. CORWIN entered the bar-room with his child, and that was the last time he ever went into the house alive. He soon came out of the house and stood on the stoop in front. He was shortly followed by the prisoner, with a pistol in his hand. CORWIN drew back the head three or more blows, and then went into the house. McDANIEL and Mrs. ANDREWS came out, took hold of CORWIN and dragged him into the bar-room. A doctor was sent for, and he found CORWIN to be dead.

The case will be continued to-day.

Supposed Murder by River Thieves.

Soon after 6 o'clock A. M. Wednesday the Harbor Police found the body of a man about 70 years of age, having gray hair and whiskers, and wearing a dark sack coat and vest, and dark brown pantaloons, floating in the North River, off the Battery. It was towed ashore and taken to Castle Garden. An employe of Castle Garden, named PETER MURPHY, on viewing the body, at once said it was that of MICHAEL NEHL, a night watchman employed on Pier No. 39 North River. MICHAEL NEHL, however, is still alive. Yesterday Dr. WOOSTER BEACH made a *post-mortem* examination of the deceased, and found that three of the ribs had been fractured, and there were bruises on the crown of the head and face, and abrasions on the arms and legs, which, in the opinion of Dr. BEACH, were made before death. A photograph of the body was yesterday taken. The inquest has been adjourned by Coroner KEENAN to enable the Police to investigate the matter.

United Presbyterian Church Synod.

The delegates to the ninth annual Synod of the United Presbyterian Church assembled last evening in the Seventh-avenue Presbyterian Church, corner of Twelfth-street. Rev. W. W. BARR, of Philadelphia, presided. At the conclusion Rev. D. S. MCHENRY, of Lansingville, N. Y., offered a prayer, and the retiring Moderator, Rev. J. J. BARR, called the Synod to order. One hundred and eleven delegates, fifty-seven ministers and forty-five elders answered to their names. When the Synod is full it will number about two hundred delegates. The election of a Moderator was postponed until this morning. It was then resolved that the Synod meet daily at 9 A. M., and remain in session until noon; reassemble at 3:30 o'clock and remain in session until 5 P. M.

Relief for the Avondale Sufferers.

The following additional subscriptions for the Avondale sufferers have been received at this office:

Rev. J. N. Gilbert	$0 25
J. P. W.	0 25
Previously acknowledged	68 25
Total	$73 50

As the Mayor's office further contributions amounting to $41.25, as are acknowledged, which, in addition to $41.25 previously received, makes a total of $115.112 25.

At the office of the Delaware, Lackawanna and Western Railroad Company, the total contributions received amount to $2,003 60.

Book Trade Sales.

The book trade sale was concluded yesterday at the rooms of Messrs. LEAVITT, STREBEIGH & Co., in Clinton Hall. ROBERTS BROTHERS, of Boston, offered a consignment of photograph albums, which realized good prices. A quantity of elegant church services and prayer books offered by WM. HUTTER & CO. realized fair prices. An elegant bible, bound in Turkey-red, with gold edges, beveled boards, brought $6 10. KERNOT's *Christian Year* (Oxford edition) realized $1. The publications of EVERS & SPOTTISWOOD, J. W. ELLIS, P. OWEN, D. & J. SADLIER & Co., W. PARKER, L. JOHNSON and others, realized fair prices.

Anniversary of the Fulton-street Prayer Meeting.

The twelfth anniversary of the Fulton-street Prayer Meeting was celebrated in the North Dutch Church yesterday at noon. This edifice was beautifully decorated with flowers, and was crowded with people. The church was built in 1769, and has been occupied ever since for worship except during the time it was used by the British as a prison in the Revolutionary War. The services were conducted by Rev. Drs. DE WITT and MCILVAIN, assisted by Rev. Dr. HENDERSON and S. IRENÆUS PRIME.

Meeting of Fresco Painters.

The German fresco painters held a meeting in Avenue A last evening, when an organization was effected, the object of which is to prevent their work from going into the hands of the house painters. It is said that the house painters, of late, have assumed the work of the fresco painters at reduced rates.

LOCAL NEWS IN BRIEF.

New-York.

The large iron steam-propeller *Rattlesnake* ran on a rock at Hell Gate, at 9 o'clock A. M. yesterday, making a hole in her bottom. Her Captain was compelled to run her ashore at the mouth of the Kills, between Randall's Island and Westchester County, where she now lies submerged, loaded with coal from Philadelphia, bound East.

HUGH KELLY, aged seven years, of No. 211 Duane-street, while passing No. 59 Barclay-street yesterday, was struck on the head and fatally injured by a wooden cellar covering, which had been thrown down by a passing truck. He was taken home.

At a meeting of the Eighth Ward School Association last evening, at No. 100 Prince-street, an interesting lecture was delivered by Mr. H. GRECKEN, on the relative importance of school and home education.

New-Jersey.

The question of the proposed consolidation of the four cities of Hudson County into one great city, also taking in some smaller places, is being earnestly discussed, and the Freeholders' Committee of Hudson County are preparing a report upon the subject. The act of consolidation will be voted upon by the people on the 5th of October.

Governor RANDOLPH has appointed as Judge Advocate General of the State militia, Colonel F. A. DE MOTT, of Morristown. The Colonel is well known in connection with the Bar of Morristown and is highly respected.

An engine was thrown off the track, yesterday morning, on the Morris and Essex Railroad, near the Spring-street switch, Newark, and caused the detention of three trains over an hour. No damage was done.

General BUSELING has, since the 4th of September last, paid 3,319 pensioners over $300,000.
